QUESTION 1

Where could you write code to change the color of a JSF input text component if the value of the salary field on the same page is higher than a fixed value? (Choose the best answer.)

- A. in a backing bean
- B. in the validation for the view object's salary attribute
- C. in the CSS file that defines the skin for the application
- D. in a custom validator defined at the field level

Correct Answer: D

QUESTION 2

Which three options are available in the ADF Controller that are not available in the generic JSF 2.0 controller layer? (Choose three.)

- A. pageflow scope: a memory scope for managed beans that is available for several pages (longer than a request scope and shorter than a session scope)
- B. ability to break the page flow of an application into multiple files
- C. subflows that can be included as regions inside a page
- D. method calls as part of the definition of a page flow
- E. defining managed beans that contain references to components on a page

Correct Answer: ACE

QUESTION 3

Which two statements describe the characteristics of an entity object? (Choose two.)

- A. An entity object represents a cache for records retrieved from the database.
- B. An entity object includes an ORDER clause to allow you to order the data in it.
- C. An entity object includes a WHERE clause to allow you to shape the data in it.
- D. Every column in a database table must be represented as an entity object attribute.
- E. An entity object definition is described in XML.

Correct Answer: AD

QUESTION 4

Which two statements describe the characteristics of a view object?

- A. it represents a row in the specified database table.
- B. it represents an association between two entity objects.
- C. it encapsulates a SQL query and simplifies working with data from a database.
- D. it allows data to be ordered based on an ORDER clause.
- E. it must include every attribute defined in an underlying entity object.

Correct Answer: D

QUESTION 5

Which statement describes the Oracle implementation of model-view-controller (MVC)? (Choose the best answer.)

- A. Oracle ADF provides a "pure" implementation of MVC. with the model layer handling page navigation and encapsulating business logic.
- B. ADF Controller provides support for application tasks such as validation, state management, security, and business-process orchestration.
- C. ADF bindings provide a layer of abstraction on top of the business services to enable the view and controller layers to work with different implementation
- D. JSF Controller is the best choice for ADF Faces-based web applications because it enables you to break up an application's page flow into re-usable fli

Correct Answer: C
