QUESTION 1

On a normally well-performing environment, you are experiencing unexpected slow response times, or no

server response, for some page requests in WebCenter Portal? You are attempting to debug this issue

starting at WLS.

Which two diagnostic steps should you take to resolve this issue?

A. Submit more requests to the server to see if it responds.

B. Check the WLS admin console to see the status of the managed server.

C. Check the diagnostic log file for the managed server to see if there are STUCK threads.

D. Perform a cold restart of the server.

Correct Answer: CD

QUESTION 2

When developing custom task flows for a Portal application, you should ensure that _____.

A. no custom task flow contains any JavaScript

B. the correct ADF version is used for your version of Portal environment

C. the Content Repository is running, because this is where the task flows are stored

D. all CSS styling of the task flows is kept within the taskflow, because Portal Skins cannot change the look and feel of a custom task flow

Correct Answer: D

QUESTION 3

Your customer has configured Oracle Secure Enterprise Search (SES) with Oracle WebCenter Portal. The

customer is complaining about the search results not including secured resources. The WebCenter

Diagnostic log file indicates the below error:

Received status "failed" during proxy login with application entity "weblogic" to Oracle SES at http://

host:port/search/query/OracleSearch, as search user "vicki". Defaulting to public. Which three actions are

necessary to resolve the issue?

A. Confirm that Oracle SES is configured with an identity management system to validate and authenticate users.

B. Confirm that WebCenter Portal and Oracle SES use different identity management systems (Active Directory or Oracle Internet Directory).

C. All repositories (such as WebCenter Portal, WebCenter Content Server, and Oracle WebCenter Portal Discussions Server) must share the same user base as Oracle SES.

D. Oracle SES must have a trusted entity for allowing WebCenter Portal end users to be securely propagated at search time.

Correct Answer: BCD

QUESTION 4

Which two options correctly describe how you can add Oracle BPM task flows to a portal page?

A. You can add BPM task flows to any page if the portal contains BPM task flows in its resource catalog.

B. You can add BPM task flows to the pages of a Process Space that was created by extending the domain with the Process Spaces domain extension templates.

C. You can add BPM task flows to any page that you have customized to include BPM attributes.

D. You can add BPM task flows to any page in a portal, if the portal server is installed in a SOA domain.

Correct Answer: BC

QUESTION 5

Which statement is not true?

A. Responsive Design allows a page to change content visibility and or layout in the browser if the browser is resized.

B. A page using Responsive Design is refreshed in the portal server when the size of the browser is changed.

C. Responsive Design includes adding server-side logic to conditionally display areas on a page.

D. Responsive Design allows pages to target more than one device size or orientation.

Correct Answer: D
