100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Oracle  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

## QUESTION 1

Which three statements about Oracle RAC background processes are correct?

- A. ACMS (Atomic Controlfile to Memory Service) is an agent that contributes to ensuring that a distributed SGA memory update is either globally committed on success or globally aborted if a failure occurs
- B. GTXO-j (Global Transaction Process) controls the flow of messages to remote instances, manages global data block access, and transmits block images between the buffer caches or different instances
- C. LMON (Global Enqueue Service Monitor) monitors global enqueues and resources across the cluster and performs global enqueue recovery operations
- D. LMD (Global Enqueue Service Daemon) manages incoming remote resource requests within each instance
- E. LMS (Global Cache Service Process) manages non-Cache Fusion resource requests such as library and row cache requests
- F. LCKO (Instance Enqueue Process) manages background slave process creation and communication on remote instances

Correct Answer: ACD

---

## QUESTION 2

Which statement about the AU\_SIZE disk group attribute is incorrect?

- A. It specifies the size of the allocation unit for a disk group.
- B. It can be changed at any time for any disk group.
- C. You can view the value of this attribute in the ALLOCATION\_UNIT\_SIZE column of the V\$ASM\_DISKGROUP view
- D. The default size is 1 MB.

Correct Answer: B

---

## QUESTION 3

Which three options can be used for storing database files in an Oracle Real Application Clusters database?

- A. Shared disk partitions as raw devices
- B. Shared disks managed by Oracle Automatic Storage Manager (ASM)
- C. Local file system
- D. Shared disk partitions as block devices
- E. Network file system (NFS) on a certified network-attached storage (NAS) filer

F. Oracle Automatic Storage Management Cluster File System (ACFS)

Correct Answer: BEF

---

#### QUESTION 4

Which statement accurately describes the benefit of the policy-managed database feature with Oracle RAC 12cR1?

- A. It protects against cascade failures due to network usage. It migrates workload isolation to specific pools. Less important workloads shut down immediately.
- B. It protects against cascade failures due to load. It ensures that workload isolation is balanced between pools. Less important workloads start transactionally
- C. It protects against cascade failures due to load. It ensures workload isolation between pools. Less important workloads shut down transactionally
- D. It protects against cascade failures due to load. It ensures workload isolation between pools. Less important workloads shut down and start uniformly.
- E. It protects against cascade failures due to load. It ensures workloads are not isolated between pools. Less important workloads shut down transactionally.

Correct Answer: C

---

#### QUESTION 5

Which statement about multipathing is incorrect?

- A. Multipathing solutions provide failover by using redundant physical path components
- B. Multipathing is a software technology implemented at the operating system device level
- C. Multipathing improves system performance by distributing the I/O load across all available paths.
- D. Multipathing is automatically configured when Oracle ASM discovers multiple paths to the same disk space.

Correct Answer: D
