QUESTION 1

During the installation of Oracle Grid Infrastructure 12cR1, you decide to configure the Grid Infrastructure Management Repository. Where will the repository be stored?

- A. In its own single instance Oracle Database 12cR1 database and managed as a failover database
- B. In the first RAC database created on the cluster
- C. In its own RAC 12cR1 database with load balancing enabled
- D. On a node outside the cluster to guard against cluster failure
- E. Within the Grid Infrastructure home as a file-based repository

Correct Answer: A

QUESTION 2

There is an instance for which the instance type is set to ASMPROXY .Which two statements are correct?

- A. We know it can be shutdown when ACFS is not running.
- B. We know this cluster is using Flex ASM.
- C. We know Oracle ASM Dynamic Volume Manager is not supported here.
- D. We know this is an Oracle Restart configuration.
- E. We know this node must have a direct ASM client running

Correct Answer: BE

QUESTION 3

You have recently completed building an 8-node 12cR1 RAC cluster, and you are now seeing a lot of instability, congestion, and network packet losses in the network. Which two items related to the private interconnect could have caused these issues?

- A. IP addresses allocated to the private interconnect have been specified in /etc/hosts
- B. The connections between the cluster nodes for both public and private interfaces are using the same switch
- C. All the private interfaces used for the interconnects are being configured in separate subnets
- D. You have used crossover cables for the cluster interconnect

Correct Answer: BD

QUESTION 4

Identify the incorrect statement about server pools.

- A. Server pools divide a cluster into logical groups of servers in which the application can be a database or non database.
- B. An application is considered a singleton when it runs on a single server in a pool. The database administrator must use the CRSCTL utility to create and manage clusters that contain Oracle RAC databases
- C. Oracle Default Server Pools are defined as FREE and GENERIC Server Pools.
- D. Database administrators can create and manage server pools that will contain Oracle RAC databases by using the SRVCTL utility.

Correct Answer: C

QUESTION 5

What device path do you have to specify in ASM, if you want to use the multipath device?

/dev/sdd = first path

/dev/sdd = second path

/dev/multipatha = path of the multipath OS driver

- A. Only /dev/sdc is enough, because asmlib knows it is a multipath device.
- B. /dev/sdc as disk group and /dev/sdd as failure group.
- C. You need to specify all the three devices and only then ASM will know this is a multipath device.
- D. Only /dev/multipatha is enough.

Correct Answer: D
