QUESTION 1

A customer maintains a high-volume data table, which holds the discounts that are applicable to products. The discount information is needed in various sections in the pricing function to calculate line item prices. It has been identified that the

data table queries to fetch the discounts are significantly degrading the performance of the Commerce pricing function.

Which option will improve performance?

- A. indexing the Util library functions
- B. performing one BMQL query for the data table, storing the results in dictionaries, retrieving the values from the dictionaries, and using them wherever needed
- C. splitting the function into multiple Util library functions
- D. splitting the function into multiple Commerce library functions

Correct Answer: B

QUESTION 2

Your client requires configurators with 400 configurable attributes that don't need to be selected in a specific order and the client is concerned about page load time. How would you utilize Configuration Flows to provide an optimal user experience?

- A. Use CSS to hide irrelevant attributes during selection.
- B. Use tabs to display attributes.
- C. Display attributes using a multi-node config flow.
- D. Display attributes on one tab in groups.

Correct Answer: C

QUESTION 3

You have 50 000 quotes in your BigMachines site. Based on a new requirement that you received from your client, you have added a new line item attribute to the line item grid, which shows a customer-specific discount for the line item part,

fetched from a data table.

How would you update the existing quotes to show this discount value?

- A. Create a new Commerce library function and pass a quote numbers as input.
- B. Update the quotes manually.
- C. Run a mass update all quotes.
- D. The existing line items will get updated automatically.

Correct Answer: D

QUESTION 4

Which two statements are true about parts integration?

- A. A BigMachines parts database can be integrated only with Salesforce.
- B. BigMachines or a third-party system can be used to maintain parts data.
- C. Salesforce cannot store parts as products, so you must store parts and price book associations in BigMachines.
- D. BigMachines can support parts integration with any system via FTP upload.

Correct Answer: AB

QUESTION 5

When designing an integration with an ERP system, you need to communicate with a third party integration tool (such as a middleware or a hub). Which two statements are true about a middleware in this scenario?

- A. The third party tool cannot be configured to modify the XML for better communication.
- B. The third party tool can transform incoming XML as well as outgoing XML when it comes to communicating with applications.
- C. A request from BigMachines can reach the ERP system even if there is an error in processing the request with the third party tool.
- D. A third party tool calls BigMachines to get valid authentication.
- E. BigMachines needs to pass any necessary authentication to the third party tool.

Correct Answer: CD
