QUESTION 1

Which Oracle Enterprise Manager Pack includes deployment procedures?

- A. Configuration Management
- B. Configuration Pack for Middleware
- C. Database Lifecycle Management Pack
- D. Diagnostics Pack for Non-Oracle Middleware

Correct Answer: C

Database Lifecycle Management Pack comes with out-of-box Deployment Procedures to provision and patch the Oracle Database (both Single Instance Database and RAC) including the underlying infrastructure. Enterprise Manager supports segregation of duties, so that a Designer can create the provisioning and patching workflows while an Operator can simply deploy the databases using those workflows.

QUESTION 2

What Enterprise Manager functionality can you use to monitor non-Oracle components from the Oracle Enterprise Manage console?

- A. User exits
- B. Connector Framework
- C. Management plug-ins
- D. Feature not supported by Oracle Enterprise Manager

Correct Answer: C

Enterprise Manager allows you to monitor and manage a variety of components out-of-the-box.

The Management Plug-ins allow you to seamlessly monitor and manage non-Oracle components from the Grid Control console by providing an easy way to specify new classes of components for Enterprise Manager to monitor.

QUESTION 3

Which one would you import from an LDAP directory to use in Oracle Enterprise manager Cloud Control Chargebacks?

- A. Server names
- B. IP addresses
- C. Cost centers

D. Database account names

E. Subsidiaries

Correct Answer: E

You can import a business hierarchy from an LDAP server.

A successfully imported LDAP cost center hierarchy generates a scheduled repeatable job to run at the beginning of each report cycle (typically the first of the month) to sync the hierarchy with its counterpart on the LDAP server.

QUESTION 4

Which three activities can you perform by utilizing the monitoring templates in Oracle Enterprise Manager?

A. Apply standardized monitoring settings across managed targets.

B. Create once, and then apply monitoring and policy settings as needed.

C. Apply a template only to targets of the same type.

D. Clone templates across VMs.

E. Export templates directly to tape.

Correct Answer: ABC

Monitoring templates simplify the task of standardizing monitoring settings across your enterprise by allowing you to specify the monitoring settings once and apply them to your monitored targets. This makes it easy for you to apply specific monitoring settings to specific classes of targets throughout your enterprise. For example, you can define one monitoring template for test databases and another monitoring template for production databases.

QUESTION 5

Which two Oracle Enterprise Manager functionalities can reuse the application-Specific user session recordings from Oracle Enterprise Manager Real user Experience Insight (RUEI)?

A. Application Testing Suite

B. Application Replay

C. Application Workload Generator

D. Configuration Management

E. Compliance Management

Correct Answer: BD

B: In order to capture Web application workloads, Application Replay uses Oracle Real User Experience Insight (RUEI).

D: You can install the Configuration Change Console (included in the Configuration Management Pack) if you want real-time configuration change monitoring. Real-time configuration monitoring means continuous detection, validation, and alerting of any configuration change that could be authorized or unauthorized.
