QUESTION 1

Identify four capabilities of the Oracle Enterprise Manager Compliance Management feature evaluate the compliance of targets and systems.

- A. Defining, customizing, and managing compliance standards
- B. Defining, customizing, and managing compliance standard rules
- C. Providing advice on how to bring a target and system into compliance
- D. Providing advice on how to bring a target, but not a system into compliance
- E. Defining, customizing, and managing custom compliance formulas
- F. Defining, customizing, and managing compliance frameworks

Correct Answer: ABDF

Features of compliance management:

(A)

Compliance Standards

(B)

Compliance Standard Rules

(F)

Compliance Framework

C (not D): The Oracle Enterprise Manager Compliance Management solution:

*

Advises on how to change configuration to bring targets and systems into compliance with respect to best practices

*

Determines if targets and systems have valid configuration settings automatically

*

Determines if targets and systems are exposed to configuration-related vulnerabilities automatically

Note:

(A) A compliance framework maps to a set of compliance standards that perform a collection of checks following broadly accepted best practices to ensure that IT infrastructure, applications, business services and processes are organized, configured, managed, and monitored correctly. A compliance standard evaluation can provide information related to platform compatibility, known issues affecting other customers with similar configurations, security vulnerabilities, patch recommendations, and more. Customers can run an evaluation of compliance standards in order to learn about how they can bring their systems into compliance with recommended best practices and improve the stability and security of

their systems.

QUESTION 2

Which three abilities are supported by the hardware management function in Oracle Manager Ops Center?

- A. Updating the system firmware
- B. Configuring the Infiniband fabric
- C. discovering the network devices
- D. configuring the security devices
- E. updating firmware on third party storage

Correct Answer: ABC

A:

*

Oracle Enterprise Manager Ops Center uses firmware profiles to provision, or update firmware on an asset.

*

Oracle Enterprise Manager Ops Center supports a wide variety of hardware resources. This release of Oracle Enterprise Manager Ops Center has been extended to support the firmware update of components such as RAID Controllers,

Expanders, Disks and PDUs. You can now manage the firmware for a variety of hardware resources in Oracle Enterprise Manager Ops Center.

B: Oracle Enterprise Manager Ops Center supports Ethernet and InfiniBand network protocols.

C: In Oracle Enterprise Manager Ops Center, networks become part of a network domain in the following ways:

An asset that has a network is discovered.

A user creates a network.

A network is created when it is required. This is a dynamic network.

QUESTION 3

The shared file system loader configuration on the Oracle Enterprise management Service is for _____.

- A. Auditing
- B. Security

- C. High availability
- D. High availability and security

Correct Answer: C

The Management Service for Grid Control has a high availability feature called the Shared Filesystem Loader. In the Shared Filesystem Loader, management data files received from Management Agents are stored temporarily on a common

shared location called the shared receive directory. All Management Services are configured to use the same storage location for the shared receive directory. The Management Services coordinate internally and distribute among themselves

the workload of uploading files into the Management Repository. Should a Management Service go down, its workload is taken up by surviving Management Services. You must choose a shared receive directory that is accessible by all the

Management Services using redundant file storage.

Note:

Oracle strongly recommends you to configure a shared file system loader so that a common location is maintained to store all the metric data files uploaded by the Management Agents.

QUESTION 4

Oracle Enterprise Manager Groups enable users to _____.

- A. Send email notifications based on Repeat Frequency
- B. Specify monitoring and policy settings once and apply them as often as needed
- C. Group only homogeneous targets
- D. View the summary status of the targets within the group

Correct Answer: B

*

Enterprise Manager Groups enable administrators to logically organize distributed targets for efficient and effective management and monitoring

*

By combining targets in a group, Enterprise Manager provides management features that enable you to efficiently manage these targets as one group. Using the Group functionality, you can:

/ View a summary status of the targets within the group. / Monitor incidents for the group collectively, rather than individually.

/ Monitor the overall performance of the group.

/ Perform administrative tasks, such as scheduling jobs for the entire group, or blacking out the group for maintenance periods.

QUESTION 5

Which feature provides real-time change detection?

- A. Grid Control
- B. Configuration Change Console
- C. Application Configuration Console
- D. Database Control

Correct Answer: B

Configuration Change Console adds:

*

Real-time change detection

*

Out-of-box policies, compliance assessment and compliance dashboard

*

Reconciliation with change management systems

*

Helps ensure compliance with regulatory and industry standards such as Sarbanes-Oxley and PCI
