QUESTION 1

While using the Service Candidate Selection Framework It becomes apparent that there is another factor specific to the organization that negatively impacts the development of Services that is not being captured by any of the existing criteria. How should this situation be handled?

A. A new realization inhibitor criterion should be added to the Parameters worksheet (and be propagated through the other worksheets) to capture and score this additional factor.

B. A new realization benefit criterion should be added to the Parameters worksheet (and be propagated through the other worksheets) to capture and score this additional factor.

C. New realization benefit and realization inhibitor criteria should be added to the Parametersworksheet (and be propagated through the other worksheets) to capture and score this additional factor.

D. This additional factor should be ignored because all of the important criteria are already included in the Service Candidate Selection Framework.

E. Replace one of the existing realization Inhibitor criterion with a new criterion that captures this additional factor.

F. Replace one of the existing realization benefit criterion with a new criterion that captures this additional factor.

Correct Answer: BF

QUESTION 2

Which two statements are true with respect to SOA Services?

A. A Service must not have any dependency on the identity of the consumer that invokes it.

B. Services should be aware of the protocol used to invoke them, where they physically exist, and on what type of hardware or operating system they run.

C. In order for Services to be versatile and support reuse, there must be no separation of concerns in terms of what they do and how they are used.

D. Services must not be tied to any particular physical location.

Correct Answer: AD

QUESTION 3

It has come to your notice that your organization is suffering from service sprawl whereby, duplicate services exist in production. After some Investigation you have come to the conclusion that your existing SOA Services are not classified and therefore, making Service Discovery challenging. Which initial classification scheme should you utilize to classify your SOA Services?

A. Organizational Model

B. Technology Vendor

C. Business Functional Model

D. Reference Architecture Service Layer

E. Reference Architecture Capability

Correct Answer: A

QUESTION 4

Refer to the exhibit. What is the correct order of activities to complete the steps in the SOA requirements process. Step 3, Create/Expand Business Functional Model is already completed for you.

A. Step 1, Classify the Requirements against the Functional Model; Step 2, Refine Requirements into Enterprise Requirements; Step 4, Gather and Review Project Requirements.

B. Step 1, Refine Requirements into Enterprise Requirements; Step 2, Gather and Review Project Requirements; Step 4 Classify the Requirements against the Functional Model.

C. Step 1, Gather and Review Project Requirements; Step 2, Refine Requirements into Enterprise Requirements; Step 4, Classify the Requirements against the Functional Model.

D. Step 1, Gather Enterprise Service Requirements; Step 2, Classify the Requirements against the Functional Model; Step 4, Gather and Review Project Requirements.

E. Step 1, Gather Project Service Requirements; Step 2, Classify the Requirements against the Enterprise Service Requirements; Step 4, Classify the Requirements against the FunctionalModel

Correct Answer: C

QUESTION 5

You have identified an existing Service that you would like to re-use. You need to submit a Service consumption request. Which two items are most appropriate to put into the request?

A. Data that you want to consume from the Service

B. Expected load that you will put on the Service

C. Expected usage profile, such as days of the week or hours in the day

D. Type of client that will be connecting to the Service

Correct Answer: BC
