QUESTION 1

IT organizations have at their disposal software assets that, if systematically reused in the transformation to a Service-Oriented Architecture, can potentially offer huge savings each year by increasing development productivity and decreasing software maintenance costs. The measurement that estimates an asset's value based on the development hours avoided by reusing rather than recreating it, is called?

- A. Predicted Net Hours Saved
- B. Predicted Asset Value Estimation
- C. Predicted Costs Saved
- D. Predicted Reuse Savings
- E. Predicted Development Costs Saved

Correct Answer: A

QUESTION 2

While defining the SOA Requirements Management process, you have identified the need for a SOA repository. Which three items would you store against your Service?

- A. Source code
- B. Usage Agreements
- C. Capacity Metrics
- D. Security Policies
- E. Build scripts

Correct Answer: BCD

QUESTION 3

Which list best describes the top three levels in the business function model hierarchy?

- A. Top Level Domains, Core Business Processes, and Business Step
- B. Business Functions, Business Activity, and Business Task
- C. Business Functions, Process Groups, and Core Business Processes
- D. Enterprise, Line of Business, and Department
- E. There is no common hierarchy because each organization has a different organizational structure.

Correct Answer: C

QUESTION 4

One of the goals of your newly formed SOA Initiative is to address current integration brittleness and inflexibility. Which option best supports your goal?

- A. Make sure the Service contract details how the Service was implemented so that the Service consumer can take advantage of the underlying technology platform.
- B. Utilize XML because it is flexible and Service consumers can transform the Service payload easily.
- C. Decouple Service consumers from Service providers by encapsulating and abstracting the source systems behind a Service interface
- D. Utilize REST Services because they are more flexible because they are not restrained by WS* standards.

Correct Answer: C

QUESTION 5

You have identified an existing Service that you would like to re-use. You need to submit a Service consumption request. Which two items are most appropriate to put into the request?

- A. Data that you want to consume from the Service
- B. Expected load that you will put on the Service
- C. Expected usage profile, such as days of the week or hours in the day
- D. Type of client that will be connecting to the Service

Correct Answer: BC
