QUESTION 1

Your client is unable to pull up any Country Codes in the appropriate search fields. Where in the system is the security for this field set?

- A. You can set it in the Country table security under the HRMS Install menu.
- B. You can set it in the Application Center security under the SACR security menu.
- C. You will need to build a new role to set this up.
- D. You will need to build a new permission list to set this up.
- E. You can set it in the Regulatory Region security under the HRMS Install menu.

Correct Answer: B

QUESTION 2

Your client wants to enter transfer credit for students before running the batch term activation process. Which two steps must be performed for the transfer credit to post and populate successfully after term activation has occurred?

- A. Users must enter transfer credit for the appropriate articulation term; the transfer credit will be marked as Posted even though the student is not yet term activated.
- B. Users must enter and save the transfer credit for the appropriate articulation term; the transfer credit will then be marked as Completed.
- C. The transfer credit will automatically be changed from Completed to Posted after term activation occurs.
- D. After term activation occurs, users must navigate to the Terms on Residence tab on the Term Activation page and click the Copy TC Units button to update the transfer credit and post statistics.
- E. Users must term activate the student before entering and saving any transfer credit information

Correct Answer: B

QUESTION 3

Your client wants to set up a course that can be repeated multiple times (for example, a three-credit course for which a student can earn up to 1 2 units). What would you do to reflect this requirement in the client's policy?

- A. Set repeat, unit, and completion options in the Schedule of Classes component.
- B. In the Course Catalog, raise or lower the Minimum and Maximum unit values depending on how many units the student can earn by repeating.
- C. In the Course Catalog, select the Repeat for Credit check box and enter appropriate completion and unit information.
- D. Build a course attribute by specifying the repeat completion and unit information.

E. Build a Dynamic Date class rule by specifying the repeat completion and unit information.

Correct Answer: D

QUESTION 4

Your client wishes to separate the Campus Solutions and Human Capital Management instance in such a way that each suite maintains its own records while still using External Search/Match to avoid creating duplicate EMPLIDs between employees and students.

Which options reflects integration model that would best meet this record?

- A. HECH
- B. Distinct Ownership
- C. Owner-Subscriber
- D. HECH and Distinct Ownership
- E. Owner-Subscriber and HECH

Correct Answer: A

QUESTION 5

Which two statements are true about Search/Match in relation to the application load process?

- A. The Search/Match parameters can be selected before running the application load process to avoid duplicates.
- B. The Search/Match process runs automatically with the same parameters as defined for application entry.
- C. A user can configure how the record is dealt with by Search/Match at each level, whether the record matches none, one, or multiple records.
- D. The Search/Match process runs at the record level only for records that match multiple records.
- E. The Search/Match process runs at the record level only for records that match one record.

Correct Answer: BC
