

# 1Z0-497<sup>Q&As</sup>

Oracle Database 12c Essentials

**Pass Oracle 1Z0-497 Exam with 100% Guarantee**

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.leads4pass.com/1z0-497.html>

100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Oracle  
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

## QUESTION 1

Several tables are accidentally deleted from a PDB. Which database would you immediately connect to, and as which user, to recover these tables?

- A. the CDB as the ROOT user
- B. the CDB as the CDBADMIN user
- C. the PDB as the ROOT user
- D. the PDB as the PDB Admin user

Correct Answer: A

---

## QUESTION 2

Your customer needs server availability that provides uninterrupted access to database services, handling any unexpected failure of one or more machines hosting the database server, due to a hardware or software fault. Which product should your customer use?

- A. Oracle Data Guard
- B. Oracle Streams
- C. Oracle Real Application Clusters
- D. Oracle GoldenGate

Correct Answer: C

## QUESTION 3

Which statement about the Oracle Advanced Security Data Redaction feature is true?

- A. It transparently encrypts data at rest in Oracle databases.
- B. It securely manages encryption keys.
- C. It protects against theft or loss of disks and backups.
- D. It prevents OS users from inspecting tablespace files.
- E. It limits the exposure of sensitive data in applications.
- F. It alters data in caches, buffers, and persistent storage.

G. It impacts operational activities such as backup and restore, upgrade and patch, and replication.

Correct Answer: E

Redacting Sensitive Data for Display Data Redaction provides selective, on-the-fly redaction of sensitive data in query results prior to display by applications so that unauthorized users cannot view the sensitive data. It enables consistent redaction of database columns across application modules accessing the same data. Data Redaction minimizes changes to applications because it does not alter actual data in internal database buffers, caches, or storage, and it preserves the original data type and formatting when transformed data is returned to the application. Data Redaction has no impact on database operational activities such as backup and restore, upgrade and patch, and high availability clusters.

#### QUESTION 4

Your customer is planning for a maximum-availability architecture at their data center to address their planned downtime, unplanned downtime, and replication needs.

Consider these options:

- Instance, site recovery, and heterogeneous setup
- Inter-region and intra-region load balancing across replicated databases
- Fine-grained error investigation of incorrect results
- Integrated client and application failover
- 

Fastest and simplest database replication

A.

Oracle GoldenGate

B.

Global Data Services

C.

Oracle Data Guard

D.

Data Recovery Advisor

E.

Oracle Flashback technology

F.

Oracle Advanced Queuing

Which four options would you recommend?

Correct Answer: ABCE

## QUESTION 5

YOU want to move all objects of the CONSULTANT user from the test database to theDB- USER schema of the production database. Which option of IMPDP would you use to accomplish this task?

- A. FULL
- B. SCHEMAS
- C. TRANSFORM
- D. REMAP\_SCHEMA
- E. REMAP\_TABLESPACE

Correct Answer: D
