**QUESTION 1**

Identify the two true statements about property value inheritance for dimension members in EPMA. (Choose two.)

- A. Property values are always inherited from ancestors and cannot be changed.
- B. Property values are inherited from the closest ancestor except when a property value has been specifically entered.
- C. You must manually enter and store property values for all the dimension members.
- D. Property value inheritance decreases maintenance requirements for dimensions.
- E. Inheritance takes precedence over properties defined in metadata load files.

Correct Answer: BD

---

**QUESTION 2**

Identify the three true statements about tuning FM applications. (Choose three.)

- A. Enabling ENABLEBACKGROUNDPAGEIN and setting it to 1 improves system performance.
- B. FM never addresses more than 3 gigabytes of memory on a 32 bit operating system.
- C. Subcubes in FM have no impact on performance.
- D. Memory management is an important tuning step for FM applications.
- E. The performance of the underlying repository for FM has no impact on the performance of FM.

Correct Answer: BDE

---

**QUESTION 3**

What feature in Financial Reporting allows you to "drill into" a dimension?

- A. You cannot drill into dimensions in FR.
- B. Expansions
- C. Drill Options
- D. Zoom Options
- E. Enable for Smart Slice

Correct Answer: B

---

## QUESTION 4

What four steps are required to configure an FDM application with an FM application? (Choose four.)

- A. Dimension names between FDM and FM are set in the FDM workbench or the Web client under metadata/dimensions.
- B. Define the FM application name in Integration Settings in FDM.
- C. Define the FM server name in machine profiles\' properties.
- D. Map locations to an entity using the FDM workbench under Integration Settings.
- E. Define the FDM Web server name under Integration Settings in the FDM workbench.

Correct Answer: ABCD

Integration Settings is an option in FDM web, and the only configuration in FDM workbench is the "default load balance server". The only configuration requirement for entering the FDM web server in the FDM workbench is in the HFM adapter configuration for FDM (not under Integration Setting) ?and even that is an optional setting which is only required when "Intersection Validation Report" is enabled. see fm11x\_g6\_a-target\_adapter\_readme.pdf in the Hyperion EPM documentation library.
