QUESTION 1

Which two types of applications benefit from using JavaServer Faces (JSF)?

- A. An application with a customizable UI skin
- B. An application that implements access control on each action based on user role.
- C. An application in which type conversion of the values of UI components is implemented only in Java classes.
- D. An application that sets specific database validation listeners on a UI component

Correct Answer: CD

QUESTION 2

Which two kinds of applications benefit from the adoption of service oriented architecture (SOA) inspired 100% Real QandAs | 100% Real Pass patterns and practices?

- A. An application that retains legacy systems while evolving to accommodate future business demands
- B. An application with tightly coupled services that enable messages to flow easily
- C. An application that utilizes fine-grained interfaces to provide communication to the object of a service
- D. An application in which the communication between services and the business process are platform independent.

Correct Answer: AD

QUESTION 3

Which is an objective of the Strategy pattern?

- A. To provide a way to configure a class with one of many behaviors
- B. To define an object that encapsulates how a set of objects interacts
- C. To define the skeleton of an algorithm, deferring some steps to subclasses
- D. To decouple an abstraction from its implementation so that the two can vary independently
- E. To define a family of algorithms, encapsulate each one, and make them interchangeable
- F. To allow subclasses to redefine certain steps of an algorithm without changing the algorithm's structure

Correct Answer: A

QUESTION 4

Which two functions are essential parts of a service oriented architecture (SOA) infrastructure?

- A. The service provider, which executes business logic in a stateless fashion
- B. The service consumer, which accesses services from the service repository
- C. The service repository, which stores software component metadata
- D. The service broker, which delivers well-defined service-level agreements
- E. The service look-up facility, which provides a central resource for naming and access

Correct Answer: AC

QUESTION 5

StockTeller is a Java-based application designed to retrieve the current market for a portfolio of publicly listed stocks. You have been tasked to design a bolt on module for StockTeller called EBroker, a Java E- based online application that needs to asynchronously communicate with StockTeller to retrieve market prices for securities in a secure manner.

Which web service technology would you choose to integrate StockTeller into the EBroker application?

- A. JAX-WS using HTTP
- B. JAX-WS using HTTPS
- C. JAX-RPC using HTTP
- D. JAX-RS using HTTPS

Correct Answer: B
