QUESTION 1

Which two types of applications benefit from using JavaServer Faces (JSF)?

A. An application with a customizable UI skin

B. An application that implements access control on each action based on user role.

C. An application in which type conversion of the values of UI components is implemented only in Java classes.

D. An application that sets specific database validation listeners on a UI component

Correct Answer: CD

QUESTION 2

You are the architect for XYZ bank. XYZ is redesigning their online banking offering and you need to ensure that the new design follows security best practices for the JEE platform.

Select three security best practices for JEE applications.

A. Schedule regular penetration testing.

B. Log all security related application events.

C. Implement an exception-handling strategy.

D. Encrypt data, both on the wire and at rest.

E. Use both programmatic and declarative security.

F. Treat users as untrusted even when authenticated. 100% Real QandAs | 100% Real Pass

Correct Answer: BCE

QUESTION 3

A manufacturing company has a large investment in a legacy Inventory Management System (IMS) developed with third-party technologies. You have been asked to design a Java EE application that interacts with it.

You would like to ensure the following:

Minimal application code is required to parse the communication messages.

Communication is asynchronous and stateless.

Performance import of the existing system is minimal.

100% Real QandAs | 100% Real Pass

Which two technologies combined would meet these requirements?

A. XML

B. JSON

C. RMI

D. JAX-RS

E. JAX-WS

Correct Answer: BD

QUESTION 4

Your company provides a marketplace for industrial chemicals. You are required to offer accurate pricing and quantities to all marketplace users.

Marketplace users are globally distributed.

What is the most appropriate technology to use to satisfy this requirement?

A. Server-side distribution using JAX-WS

B. Client-side polling using JAX-RPC

C. Web services using REST

D. An enterprise messaging system

Correct Answer: C

QUESTION 5

Which two statements are true about delegation as an Object-Oriented Design technique?

A. It is applied to a system only at compile time.

B. It is an essential element of the Singleton pattern.

C. It allows you to replace Inheritance with composition.

D. In Java technology, it is always implemented through the use of generics.

E. It always requires that at least two objects are involved in handling a request.

Correct Answer: CE
