class MyPersistenceData {
    String str;
    private void methodA() {
        System.out.println("methodA");
    }
}
```

You want to implement the `java.io.Serializable` interface to the `MyPersistenceData` class. Which method should be overridden?

- A. the `readExternal` method
- B. nothing
- C. the `readExternal` and `writeExternal` method
- D. the `writeExternal` method

Correct Answer: B

To implement the `java.io.Serializable` interface to the `MyPersistenceData` class, you don't need to override any methods. The `Serializable` interface is a marker interface that doesn't have any methods. It simply indicates that the class is serializable and its objects can be written to and read from a stream. Therefore, the correct answer is B.
