**QUESTION 1**

Which two are defined by SAML? (Choose two.)

- A. a standard that describes an access control policy language for XML documents
- B. a protocol by which clients can request assertions about subjects from SAML authorities
- C. a standard for including digital signatures in SOAP messages for Web services that require single sign-on
- D. the structure of the XML documents that transport authentication and authorization information between services
- E. an API in the form of the SAML reference implementation created by OASIS

Correct Answer: BD

---

**QUESTION 2**

A JAXR client has established connection with a UDDI registry and needs to get a service binding from the registry. What is required to accomplish this task?

- A. find the appropriate concept and then find the service binding associated with that concept
- B. find the appropriate authentication token and then find the service binding associated with that authentication token
- C. find the appropriate organization, get the tModel associated with that organization, and then find the service binding associated with the tModel
- D. find the appropriate organization, find the services associated with that organization, and then find the service binding associated with the service

Correct Answer: D

---

**QUESTION 3**

A developer needs to write a Web service that supports user sessions that timeout after 120 seconds. Which configuration file is correct for the developer use?

- A. web.xml
- B. server.xml
- C. ejb-jar.xml
- D. service-config.xml

Correct Answer: A

---

**QUESTION 4**

Which three can an EJB-based endpoint use? (Choose three.)

- A. HTTP sessions
- B. Java EE 5 declarative security
- C. Java EE 5 programmatic security
- D. client-demarcated transactions
- E. container-managed transactions

Correct Answer: BCE

---

## QUESTION 5

A developer is writing a Web service method that needs to accept multiple types of requests. Based on the request's content, the service performs time-consuming steps, such as verifying the user's account, checking credit ratings, and building a list of offers. Which two approaches are appropriate to use in this situation? (Choose two.)

- A. a synchronous, document-style approach
- B. a synchronous, procedure-style approach
- C. an asynchronous, document-style approach
- D. an asynchronous, procedure-style approach
- E. HTTP and HTTPS
- F. SMTP or other asynchronous protocol

Correct Answer: CF
