-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

When backing up a replication slave, which of the following replication files should also be backed up?

- A. The master.info file
- B. Any relay logs
- C. The relay index
- D. The world db file
- E. The replication world file
- F. None of the above

Correct Answer: AB

#### 32.5. Backing Up Log and Status Files

Replication slave servers create a master.info file that contains information needed for connecting to the master server, and a relay-log.info file that indicates the current progress in processing the relay logs.

---

### QUESTION 2

Another user has issued LOCK TABLES pets READ You can...

- A. Update table pets
- B. SELECT from table pets
- C. UPDATE and SELECT from table pets
- D. None of the above

Correct Answer: B

---

### QUESTION 3

Assume you compile MySQL from source and invoke configure with the following options.

```
--with-charset=latin1 --with-extra-charsets=utf8,ucs2
```

Compared to a standard binary installation that contains many more character sets, which of the following statements is/are true?

- A. The compiled version will use less disk space, because only a few character sets will be installed on disk.
- B. The compiled version will use less memory, because only a few character sets will be loaded by the server.
- C. The compiled version will use less file handles, because only a few files need to be opened when the server is

started.

Correct Answer: AB

27.1. Performance Issues To reduce the amount of disk space required by character sets for your MySQL installation and the amount of memory used by the server as it runs, don't select unneeded character sets when you configure MySQL. This requires that you compile MySQL from source rather than using a precompiled binary distribution.

---

#### QUESTION 4

which of the following best describes why table locking is often not desirable compared to page or row locking?

- A. Table locks can have deadlocks.
- B. Table locks create concurrency issues.
- C. Table locks prevent other clients from making any changes to the table until released.
- D. Table locks can cause data corruption issues if more than one client tries to make changes while locked.

Correct Answer: B

#### 28.1. Locking Concepts

Table locking is not as desirable as page or row locking for concurrency in a mixed read/write environment.

A table lock prevents other clients from making any changes to the table, even if the client that holds the lock is not accessing the parts of the table that other clients want to modify. With page and row locks, a client that locks a page or row

does not prevent changes by other clients to other pages or rows. Deadlock cannot occur with table locking as it can with page or row locking.

---

#### QUESTION 5

When you upgrade from one version of MySQL to another which of these steps are considered necessary?

- A. Check the MySQL Reference Manual upgrading section and read the parts that concern your upgrade
- B. Backup your databases
- C. Stop the MySQL server
- D. Install the new version of MySQL on top of the existing version
- E. Start the new server
- F. None of the above

Correct Answer: ABCDE

#### 24.9. Upgrading MySQL

Check the MySQL Reference Manual before performing any upgrade. Despite those cautionary remarks, upgrading MySQL usually is straightforward and can be done using the following procedure:
