**QUESTION 1**

Which of the following best describes what you might expect after disabling InnoDB at run time?

- A. It will disable InnoDBs associated memory buffers and data structures, however it will not save any memory.
- B. It will still enable InnoDBs associated memory buffers and data structures, however it will save memory.
- C. It will disable InnoDBs associated memory buffers and data structures, which will save memory.

Correct Answer: C

---

**QUESTION 2**

Which of the following best describes what mysqldumpslow does and how to use it?

- A. It shows a summary of the slow log contents.
- B. It dumps the contents of the slow log into a readable format.
- C. shell> mysqldumpslow log\_name
- D. shell> mysqldumpslow

Correct Answer: B

---

**QUESTION 3**

The stored function year\_to\_date is created by the '\\root\\'@'localhost' account as follows:

```
CREATE FUNCTION year_to_date ()  
RETURNS DECIMAL(10,2)  
SQL SECURITY DEFINER  
BEGIN  
...  
END;
```

Within the routine body, a number of calculations are made on data in the financials table and the

calculated value is returned. The only account which can access the financials table is '\\root\\'@'localhost'. If a client connects with the account '\\joe\\'@'localhost' and calls the year\_to\_date function, what will happen?

- A. The function will always execute as if it was '\\root\\'@'localhost' that invoked it since SQL SECURITY DEFINER has been specified.

- B. The function will not execute, as `\\joe\\@\\localhost\\` does not have access to the financials table
- C. The function will not execute as SQL SECURITY DEFINER has been specified. It would execute if instead SQL SECURITY INVOKER had been specified
- D. If the account `\\joe\\@\\localhost\\` has the EXECUTE privilege on `year_to_date`, the function will complete successfully

Correct Answer: D

---

#### QUESTION 4

What should you do in order to enhance the security of a standard MySQL installation on Unix- type operating systems?

- A. Disable the `mysql_access` program
- B. Run the `mysql_secure_installation` script
- C. Nothing; by default the security level of a MySQL installation is very high

Correct Answer: B

---

#### QUESTION 5

Which of the following statements are true of compressed tables?

- A. They can be uncompressed.
- B. They can not be uncompressed.
- C. They can be uncompressed but some data corruption may occur.

Correct Answer: A
