QUESTION 1

A complete restore from the tape backup of the /export/home file system has been successfully completed.

The system created a file for check-pointing or passing information between the incremental restores. What action do you take with this file?

- A. examine the /var/sadm/install/restore.log file for details of the restore
- B. delete the /var/log/restore.log file
- C. delete the restoresymtable file
- D. examine the /var/log/restore_log file for details of the restore

Correct Answer: C

QUESTION 2

You have been requested to supply a list of the Solaris software cluster groups for a project. Which command produces the required information?

- A. cat /etc/cluster
- B. cat /var/sadm/install_data
- C. grep METACLUSTER /etc/release
- D. cat /var/sadm/system/admin/CLUSTER
- E. grep METACLUSTER /var/sadm/system/admin/.clustertoc

Correct Answer: E

QUESTION 3

You have two users that are abusing the system by creating scripts that run periodically as cron jobs that continuously harass other users. You have been instructed to disable cron for these two users. Which three (what?) describe how to configure the server to block specific users from using cron? (Choose three.)

- A. Protect the crontab command so that only privileged users are allowed to run it.
- B. Remove the /etc/cron.d/cron.allow file and add their names to /etc/cron.d/cron.deny
- C. Remove the crontabs associated with each offending user in the /var/spool/cron/crontabs director.
- D. Remove their names from the /etc/cron.d/cron.allow file and add their names to /etc/cron.d/cron.deny
- E. Add their names to the /etc/cron.d/cron.deny file. It is not necessary to remove their names from the /etc/cron.d/cron.allow file.

F. Remove their names from the `/etc/cron.d/cron.allow` file only. If the default `/etc/cron.d/cron.deny` exists, it does not need to be changed.

Correct Answer: BDF

QUESTION 4

You bring down a SPARC-based system to run level 0. Now you need to create a customized device alias for one of the disks. Which OBP command allows the selection of a device path and later inserts it into the command line that creates the new device alias?

- A. show-devs
- B. find-device
- C. show-disks
- D. devalias

Correct Answer: C

QUESTION 5

As the system administrator for your department, you are asked to help a user retrieve data from a diskette. The user placed the diskette into the drive, but the OS did not recognize the new media. Volume management is enabled.

After you verify that the volume management daemon is running, which command do you execute to have the OS recognize the floppy disk?

- A. vol verify
- B. volcheck
- C. vol init
- D. volmount

Correct Answer: B
