QUESTION 1

You must set up three users to administer the artwork department. These users will be launching several applications with the EUID of department administrator. Using the RBAC mechanism, what is the sequence of events to execute this process?

A. create entries for the applications in the RBAC profile database, associate a role with the new profile entry, and give the three users access to the role

B. update the $HOME/.rbac_privs file for each user to point to applications in question and amend the user attribute database to use the admin EUID with these applications

C. create entries for the applications in the RBAC policy attributes database, associate a profile with the new policy entry, associate a role with this profile, and give the three users access to the role

D. create entries for the applications in the RBAC execution attributes database, associate a profile with the new execution entry, associate a role with this profile, and give the three users access to the role

Correct Answer: D

QUESTION 2

You are configuring a new system. You would like the system to be able to boot unattended, even if its boot disk fails.

You decide to mirror the root file systems using Solaris Volume Manager software.

Assume one (1) metastate database replica per drive.

What is the minimum number of drives that you need to place metastate database replicas on to accomplish this?

A. 1

B. 2

C. 3

D. 4

Correct Answer: C

QUESTION 3

A junior system administrator is setting up Solaris Volume Manager software on a new system for the first time. The administrator continually gets an error when attempting to create the state database replicas. The administrator has emailed

you the following command and its output:

metadb -a /dev/dsk/c0t2d0s0

metadb: newsunbox: there are no existing databases

Which command should you have the system administrator run?

A. metadb -a /dev/rdsk/c0t2d0s0

B. metainit -f /dev/dsk/c0t2d0s0

C. metadb -n -a /dev/dsk/c0t2d0s0

D. metadb -a -f /dev/dsk/c0t2d0s0

E. metainit db 1 /dev/dsk/c0t2d0s0

Correct Answer: D

QUESTION 4

You log in as the root user and issue the command:

snoop -q -o filename

What are two results of issuing this command? (Choose two.)

A. Network traffic is displayed.

B. Packet count is NOT displayed.

C. Network traffic is sent to filename.

D. The contents of the filename is in ASCII text.

E. The snoop command quits after a default amount of time.

Correct Answer: BC

QUESTION 5

The adminuser already has the following authorizations:

Solaris.admin.usermgr.pswd, Solaris.system.shutdown, Solaris.admin.fsmgr.write To add the ability to purge log files, you need to add Solaris. admin. logsvc. purge to the list of authorizations for adminuser. Which command would you use to perform this task?

A. rolemod -A Solaris.admin.logsvc.purge,Solaris.admin.usermgr.pswd, Solaris.system.shutdown,Solaris.admin.fsmgr.write adminuser

B. rolemod -A solaris.admin.fsmgr.write adminuser

C. usermod -A solaris.admin.fsmgr.write adminuser

D. rolemod -P Solaris.admin.logsvc.purge,Solaris.admin.usermgr.pswd, Solaris.system.shutdown,Solaris.admin.fsmgr.write adminuser

Correct Answer: A
