QUESTION 1

You are attempting to configure link-based IPMP on a system containing two physical interfaces. Both interfaces are in the same group. Which two statements are true in a working link-based IPMP configuration? (Choose two.)

- A. All failover addresses must have the DEPRECATED flag set.
- B. Each interface must have a unique test address.
- C. Both interfaces must be connected to the same IP network.
- D. Each interface must have a unique MAC address.
- E. IPMP must be started by running the `if_mpadmn -e` command.
- F. Both interfaces must be connected to the same switch.

Correct Answer: CD

QUESTION 2

A system administrator is implementing Solaris IP Filter for the first time. Solaris IP Filter is enabled and an initial set of filtering rules in `/etc/ipf/ipf.conf` is applied.

Unexpectedly, the rules, as implemented, are preventing users from accessing the system. The administrator wants to quickly restore user access to the system while troubleshooting incorrect rule processing in the configuration file.

Which two commands should the administrator use? (Choose two.)

- A. `ipf -f /etc/ipf/ipf.conf`
- B. `halt`
- C. `ipf -D`
- D. `ipf -Fa`
- E. `autopush -f /etc/ipf/pfil.ap`

Correct Answer: CD

QUESTION 3

Given the following `/etc/named.conf` DNS server configuration file:

```
zone "one.edu" in {  
type master;  
file "forward.zone";
```

```
allow-update { 127.0.0.1; 192.168.1.2; };  
  
};  
  
zone "1.168.192.in-addr.arpa" in {  
  
type master;  
  
file "reverse.rzone";  
  
allow-update { 127.0.0.1; 192.168.1.2; };  
  
};
```

In which way does the allow-update option change the behavior of the primary DNS server?

- A. The DNS server dynamically updates forward DNS servers.
- B. The DNS server can be dynamically updated with host information from a DHCP server.
- C. The DNS server dynamically updates secondary DNS servers.
- D. The DNS server dynamically updates reverse DNS servers.
- E. The DNS server can be dynamically updated by root DNS servers.

Correct Answer: B

QUESTION 4

Place each component of an Ethernet-II frame on its corresponding position in the frame.

Select and Place:

Place each component of an Ethernet-II frame on its corresponding position in the frame.

Position in the Frame

first	second	third	fourth	last
-------	--------	-------	--------	------

Ethernet Frame Components

Ethernet trailer

Application data

Internet header

Transport header

Ethernet header

Done

Correct Answer:

Place each component of an Ethernet-II frame on its corresponding position in the frame.

Position in the Frame

Internet header	Transport header	Ethernet header	Application data	Ethernet trailer
-----------------	------------------	-----------------	------------------	------------------

Ethernet Frame Components

Done

QUESTION 5

A network administrator correctly configures a DHCP server that is serving JumpStart and non- JumpStart clients. One of the DHCP clients asks for an IP address. It does NOT ask for any other parameters such as subnet mask, router, and encapsulated vendor options. A variable must be modified in the /etc/default/ dhcpagent file on the client to configure the DHCP client's dhcpagent to request additional networking information from the DHCP server. Which variable must be modified?

- A. PARAM_REQUEST_LIST
- B. PARAM_REQUEST_ADDRESS
- C. PARAM_REQUEST_NETWORKING
- D. PARAM_REQUEST_ROWS
- E. PARAM_REQUEST

Correct Answer: A
