QUESTION 1

Place each LAN component next to its description.

Select and Place:

Place each LAN component next to its description.

LAN Components	Descriptions
Place here	connects networks that use different protocol suites
Place here	amplifies signals to extend the distance of transmission
Place here	connects network segments and filters/forwards packets
Place here	broadcasts all packets out all connected ports

LAN components to be moved:

bridge gateway hub repeater Done

Correct Answer:

Place each LAN component next to its description.

LAN Components	Descriptions
gateway	connects networks that use different protocol suites
repeater	amplifies signals to extend the distance of transmission
bridge	connects network segments and filters/forwards packets
hub	broadcasts all packets out all connected ports

LAN components to be moved:

Done

QUESTION 2

Configuration information for BIND 8 and 9 is provided by statements in the file `/etc/named.conf`. Which four tasks can be accomplished using this file? (Choose four.)

- A. specifying a DNS server's zones of authority
- B. defining the order in which the DNS server performs host name resolution
- C. defining the order in which root servers are contacted
- D. specifying name-to-address mappings for the root servers
- E. configuring DNS dynamic updates
- F. defining security for specific zones
- G. indicating the location of the DNS server's data files

Correct Answer: AEFG

QUESTION 3

You are an administrator for a large organization that uses a single registered Class B address range. Your organization contains a number of departments that range in size from 25 to 400 employees. Each department is to be given its own separate range of network addresses. Which networking strategy efficiently uses the addresses allocated to your organization?

- A. using variable length subnet masks to divide the address space
- B. obtaining some Class A address ranges for the smaller departments
- C. using `/etc/netgroup` to create network names for each department
- D. configuring static routing tables on all hosts and routers
- E. using switches with more ports in the larger departments

Correct Answer: A

QUESTION 4

An unauthorized administrator has recently made some changes to and rebooted your server. As a result, the server is using ARP to attempt to reach hosts on a different subnetwork. Which file has been erroneously modified?

- A. `/etc/inet/services`
- B. `/etc/inet/netmasks`
- C. `/etc/inetd.conf`

- D. /etc/netgroup
- E. /etc/init.d/inetinit
- F. /etc/inet/hosts

Correct Answer: B

QUESTION 5

A section of the ifconfig -a command is run on a Solaris system with Probe-Based IPMP configured as follows:

```
hme0:1:flags=9040843 mtu 1500 index 2 inet 192.168.1.51 netmask ffffff00 broadcast 192.168.1.255
```

The address shown is marked as deprecated.

In which two situations are addresses that are marked deprecated used as source addresses for outbound packets? (Choose two.)

- A. when the system acts as a router
- B. when a static default router is configured for the system
- C. when a TCP connection is requested
- D. when an application has been explicitly bound to the 192.168.1.51 address
- E. when there are no other addresses available in the interface group

Correct Answer: DE
