QUESTION 1

How would you configure auditing to identify when an attacker has removed audit records?

- A. Execute the command `bsmconv +cnt` and reboot.
- B. Audit records already have sequence numbers by default.
- C. `auditconfig -setpolicy +cnt` should be added to `/etc/security/audit_startup`.
- D. `auditconfig -setpolicy +seq` should be added to `/etc/security/audit_startup`.

Correct Answer: D

QUESTION 2

Which two tasks can you perform using the Audit facility? (Choose two.)

- A. generate an overview of CPU usage by users
- B. generate an overview of disk space occupied by a particular user
- C. generate an overview of which users recently changed their password
- D. generate an overview of the network bandwidth in use by a particular user
- E. generate an overview of all the applications executed by a particular user

Correct Answer: CE

QUESTION 3

A web server administrator must configure an Apache 2 web server to start as the user `webservd`. The web server administrator has been assigned the "Service Operator" rights profile. While attempting to set the SMF service property `start/ user`, the web server administrator receives the following error message:

```
$ /usr/sbin/svccfg -s svc:/network/http:apache2 svc:/network/http:apache2> setprop start/user = astring:
```

`webservd` Permission Denied.

Why does this error occur?

- A. The Apache 2 web server must be started only as root.
- B. Only the superuser is permitted to change SMF property values.
- C. The administrator needs the `solaris.smf.manage` authorization.
- D. The `start/user` property does NOT exist for the Apache 2 service.

Correct Answer: C

QUESTION 4

To harden a newly installed Solaris OS, an administrator is required to make sure that syslogd is configured to NOT accept messages from the network. Which supported method can be used to configure syslogd like this?

- A. Run `svcadm disable -t svc:/network/system-log`.
- B. Edit `/etc/default/syslogd` to set `LOG_FROM_REMOTE=NO`.
- C. Edit `/etc/rc2.d/S74syslog` to start syslogd with the `-t` option.
- D. Edit `/lib/svc/method/system-log` to set `LOG_FROM_REMOTE=NO`.

Correct Answer: B

QUESTION 5

Which command sequence would you use to verify that the public key is synchronized between security associations (SA)?

- A. Execute `ipseconf -f` on the local system, and `ipseconf -l` on the remote system.
- B. Execute `ipsecalgs -l` on the local system, and `ipsecalgs -s` on the remote system.
- C. Execute `ipseconf -l` on the local system, and `ipseconf -f` on the remote system.
- D. Execute `ikecert certdb -l` on the local system, and `ikecert certlocal -l` on the remote system.

Correct Answer: D
