QUESTION 1

Which two statements are applicable to the cluster transport interfaces? (Choose two.)

- A. It is a requirement to use switches to configure the cluster transport interfaces.
- B. The cluster transport interfaces are monitored on each node through heartbeats.
- C. A minimum of two private networks are required to configure the cluster transport interfaces.
- D. Global data access is performed across a single interface which can fail over to a backup interface.

Correct Answer: BC

QUESTION 2

You have a customer with a two-node cluster. The only storage accessible from both nodes is a NetApp NAS device. What kind of quorum configuration should the customer choose?

- A. They must use a NetAPP NAS quorum device only.
- B. They must use a quorum server quorum device only.
- C. They can choose either the NetAPP NAS quorum device or the quorum server quorum device. If they choose both, they have too many quorum votes.
- D. They should configure both a NetAPP NAS quorum device and a quorum server quorum device. This will give them the correct number of total quorum votes and the best redundancy.

Correct Answer: C

QUESTION 3

Sun Cluster 3.2 can take advantage of the new ZFS file system available with Solaris 10. Which two new features are available with ZFS and Sun Cluster 3.2? (Choose two.)

- A. ZFS has a built-in volume manager.
- B. ZFS can be used as a server replication method.
- C. The disks are used as a storage pool.
- D. ZFS can be used as a highly available global file system.

Correct Answer: AC

QUESTION 4

You want to give a non-root user the ability to online, enable, disable, and switch over elements of the cluster, but NOT

to modify the configuration. In which two ways can you accomplish this? (Choose two.)

- A. Give that specific user the Solaris.cluster.admin authorization.
- B. Give that user the ability to su to a non-root role that has the Solaris.cluster.admin authorization.
- C. Give that user the ability to su to a non-root role that has the Solaris.cluster.modify authorization.
- D. You do not have to do anything. Every user can accomplish what you want since they will naturally all inherit the Solaris.cluster.read authorization from the Basic Solaris User profile.

Correct Answer: AB

QUESTION 5

A customer needs to do some maintenance to an application resource in their NFS resource group. They want to have NFS resources active, but want to be sure that if anything goes wrong during the operation, the NFS service is NOT restarted or the resource group switched.

How can this be accomplished ?

- A. The customer can suspend the resource group.
- B. The customer can place the resource group into a quiescent state.
- C. The customer can place the resource group offline and then enable only the required resources.
- D. The customer can keep the resource group online and then disable monitoring for all the resources.

Correct Answer: A
