100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by Oracle Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

### QUESTION 1

When a node leaves the cluster as a result of a failure, it is prevented from having further access to shared storage. What is this process called?

- A. failure fencing
- B. data replication
- C. cluster amnesia
- D. SCSI-1 reservation

Correct Answer: A

---

### QUESTION 2

You are required to integrate an Oracle database into the cluster framework using the HA-Oracle agent. You have configured a logical host and failover file system for the database on shared storage with a mount point of /u01 and need to integrate the database into the cluster framework. You enter the following command on node1: `/usr/cluster/bin/clrsc create -g ora-rg -t SUNW.oracle_server -p ORACLE_SID=SID1 -p ORACLE_HOME=/u01 /oracle/product/10.2.0/db_1 -p Alert_log_file=/u01/oracle/admin/SID1/bdump/alert_SID1.log -p parameter_file=/u01/oracle/admin/SID1/pfile/initSID1.ora -p connect_string=sc_fm/sc_fm ora-server-res` and get the following output: `Mar 13 21:04:25 node2 SC[SUNWscor.oracle_server.validate]:ora-rg:ora-server-res:Validation failed. ORACLE binaries not found ORACLE_HOME=/u01/oracle/product/10.2.0/db_1` What is required to successfully register the agent?

- A. The message indicates that the dba has NOT yet created the Oracle database.
- B. The Oracle binaries cannot be installed on a failover file system and should be reinstalled on local storage on each cluster node.
- C. The ora-server-res resource should be made dependent on the failover file system with the `-p Resource_dependencies` property.
- D. The Oracle listener resource type should be registered first so that the cluster framework can connect to the database with the `connect_string sc_fm/sc_fm` to verify the database is running.

Correct Answer: C

---

### QUESTION 3

The Sun Cluster 3.2 framework provides Global Storage Services. Which is applicable?

- A. DID devices must be used to configure a quorum server quorum device.
- B. DIDs are used as components of Solaris and Veritas Volume Manager volumes.
- C. Each cluster node accesses the global device groups through the local path to the storage.
- D. Shared disks that may have different logical names on different nodes are given a unique cluster-wide DID number.

Correct Answer: D

---

#### QUESTION 4

What are the requirements for synchronizing the time-of-day clocks between cluster nodes?

- A. You must use the supplied `/etc/inet/ntp.conf.cluster` file so that the nodes synchronize only between themselves. You cannot use any other configuration.
- B. You may use any NTP configuration, as long as the clocks on the nodes remain synchronized. The cluster will use `/etc/inet/ntp.conf.cluster` file if you have no other configuration.
- C. You must have both a traditional `/etc/inet/ntp.conf` file for all nodes to synchronize with a trusted source on the public network, and an `/etc/inet/ntp.conf.cluster` so that the nodes synchronize among themselves.
- D. You must manually modify the `/etc/inet/ntp.conf.cluster` file and choose a node that will be marked with the server keyword. You must manually mark all other nodes with the client keyword.

Correct Answer: B

---

#### QUESTION 5

Which two are contained in the cluster configuration repository? (Choose two).

- A. Disk ID (DID) device mappings
- B. cluster private network configuration
- C. a list of all the installed application agents
- D. binaries that will be used to start applications

Correct Answer: AB
