QUESTION 1

Which annotation specifies the metadata as a javax.servlet.http.HttpSessionListener?

A. @Listener

B. @WebListener

C. @WebSessionListener

D. @HttpSessionListener

Correct Answer: A

Reference: http://docs.oracle.com/cd/E12840_01/wls/docs103/webapp/annotateservlet.html (table 8-1, third row)

QUESTION 2

Which code snippet specifies the metadata for a servlet with:

(i)

 url mapping "/mytest"\\'

(ii)

 Initial parameter with name "debug" and value "10"\\' (iii) Support asynchronous operation?

A.

@WebServlet("/mytest") @InitParam(name-"debug" va1ue = "10") @Asynchronous public class TestServlet extends HttpServlet {}

B.

@WebServlet ("/myset") @WebParam(name = "debug" value = "10") Public class testServlet {}

C.

@WebServlet (urlPatterns = { / "mytest"}, Initparams = {@InitParam (name = "debug", value = "10") }, supportAsync = true) public class TestServlet extends HttpServlet {}

D.

@WebServlet (urlPatterns = { / "mytest"}, Initparams = {@InitParam (name = "debug", value = "10") }, asyncSupported = true) public class TestServlet extends HttpServlet {}

E.

@WebServlet (urlPatterns = { / "mytest"}, Initparam = @WebInitParam (name = "debug", value = "10"), supportAsync = true) public class testServlet {}

Correct Answer: D

QUESTION 3

Which defines the welcome files in a web application deployment descriptor?

A. / welcome - jsp /index-html

B. welcome .jsp index.html

C. welcome.jspcontact us

C. contact us

Correct Answer: D

QUESTION 5

To take advantage of the capabilities of modern browsers that use web standards, such as XHTML and CSS, your web application is being converted from simple JSP pages to JSP Document format. However, one of your JSPs, /scripts/ screenFunctions.jsp, generates a JavaScript file. This file is included in several web forms to create screen-specific validation functions and are included in these pages with the following statement:

```
10. <head>
11.   <script> src='/scripts/screenFunctions.jsp'
12.       language='javascript'
13.       type='application/javascript'> </script>
14. </head>
15. <!—body of the web form -->
```

Which JSP code snippet declares that this JSP Document is a JavaScript file?

A.

C.

E. No declaration is needed because the web form XHTML page already declares the MIME type of the /scripts/screenFunctions.jsp file in the tag.

Correct Answer: D
