### QUESTION 1

When defining a customer-defined template using a new Time Calculation Rule fast formula, which two options on the Parameter train stop enhance the rule setup to minimize rule setup errors?

- A. Set the proper Parameter type values.
- B. Set the Time Attribute Value to Value Set.
- C. Set the "Required" flag.
- D. Set the Group.
- E. Set the Time Attribute Value Type to Text.
- F. Set the Time Attribute Value Type to Data Source.

Correct Answer: AF

---

### QUESTION 2

Some users are complaining that the Time and Labor system is allowing them to record time against projects in which they are not team members. Further, the time type column name is project name, whereas the values are project numbers. What should you do to correct this issue?

- A. Create a new layout set with the "Enable Project Team membership" option selected. Edit the time card layouts for the new layout set, delete the "Project Number" row, create a new row, select "Project Name", and then assign to the appropriate time entry profile.
- B. Edit the existing layout set and select the "Enable Project Team membership" option from the drop-down list. Create a new time card layout from scratch and select the "Project Name" check box.
- C. Create a new layout set with the "Enable Project Team membership" option selected. Because the time type selected cannot be changed, you change the column name to "Project Number" so that it is consistent with the data selected.
- D. This cannot be done in Time and Labor, but it can be done in Cloud Projects. So you would have to change appropriate options in Cloud Projects to fix both issues.
- E. The "team member" issue cannot be fixed in Time and Labor; it must be fixed in Cloud Projects. Also, because the time type selected cannot be changed, you change the column name to "Project Number" so that it is consistent with the data selected.

Correct Answer: A

---

### QUESTION 3

A customer requires Oracle payroll validation to run when a user goes from the time entry page to the time card review page, and for all payroll time types to be part of the transfer to payroll. Which two options should you use to configure this?

- A. Use a time consumer set containing the delivered time category of "all payroll entries" and set "Validate on time card

actions" to Next.

B. Use a time consumer set containing the delivered time category of "all payroll plus absence entries" and set "Validate on time card actions" to Next.

C. Use a time consumer set containing the delivered time category of "all payroll entries" and set "Validate on time card actions" to "Submit only."

D. Use a time consumer set containing the delivered time category of "all payroll entries" and set "Validate on time card actions" to "Submit and save."

E. Use a time consumer set containing the delivered time category of "all payroll plus absence entries" and set "Validate on time card actions" to "Submit and save."

Correct Answer: AD

---

#### QUESTION 4

A worker is supposed to report for a morning shift with a scheduled start time of 08:00 AM. In the related shift limits, the grace period is set to 15 minutes and the Start Early period to 60 minutes. The worker punches in at 07:15 AM.

What exception is generated?

A. Late in time entry

B. Early in time entry

C. Invalid in time entry

D. No exception is generated.

Correct Answer: B

---

#### QUESTION 5

Your customer has implemented Fusion Payroll and defined a set of elements and CIRs (Calculation Information Repository) with restricted element eligibility.

How should you restrict the displayed payroll time types to match the payroll element eligibility?

A. The payroll elements are placed in one multiple-attribute time card field and the layout set is assigned by using the time entry profile.

B. The payroll elements are placed in one multiple-attribute time card field and restricted by using the enabled value.

C. The payroll element eligibility definition is automatically used to restrict the displayed values on the time card.

D. The payroll elements are placed in several multiple-attribute time card fields and the layout set is assigned by using the time entry profile.

Correct Answer: A
