### QUESTION 1

Your customer wants to publish Item Attributes and Item Category Assignments in Oracle Product Hub Cloud. Identify two item entities that the customer can select for publication in Oracle Product Hub Cloud.

- A. Item Master
- B. Packs
- C. Supplier User Roles
- D. Associations-Supplier Site Organization

Correct Answer: BD

---

### QUESTION 2

Oracle Product Data Quality has standard validation rules that can be used to overcome data quality issues. Identify three events where they are applied.

- A. when exporting a batch of items
- B. when running a BI report that identifies data quality
- C. when editing an item
- D. when creating multiple items
- E. when implementing a batch of items

Correct Answer: CDE

---

### QUESTION 3

During the Design phase of implementing Oracle Product Hub Cloud, you are asked to review the existing processes of Catalog sharing. You decide to add a Category to the Catalog for sharing.

What are the four business benefits of this decision?

- A. The Category hierarchy and any assigned items to the Categories in the shared content can be referenced within the Catalog.
- B. The complete Category hierarchy in the shared content can be referenced within the Catalog if the items are not assigned to Categories.
- C. The referenced content can belong to only one Category if a Category hierarchy exists.
- D. The referenced content can belong to more than one Category.
- E. The Source Catalog content can be shared with multiple Catalogs.

F. The Catalog contents can be maintained in a single place.

Correct Answer: ADEF

During the creation of the catalog, sharing can be enabled by specifying a single source catalog that will be used for sharing by reference and setting the value of the sharing content to control what content will be shared from the source catalog. The advantage of using sharing by reference is source catalog content can be shared to multiple catalogs and maintained in a single place, the source catalog. In addition, the referenced content can be more than one category, for example a complete category hierarchy and any assigned items to categories in shared content can also be reference within the catalog.

#### QUESTION 4

Which three statements are true in regard to Pack Types?

- A. They are used to describe Global Trade Item Number (GTIN) hierarchy level.
- B. Pack Types are defined as Catalogs in Product Hub
- C. Pack Types are defined as items in Product Hub.
- D. They are known as Trade Item Unit Descriptors (TIUD)
- E. Pack Types define each level in a packaging hierarchy.

Correct Answer: ADE

#### QUESTION 5

Your customer wants to initiate a change order when the value of the Weight attribute in an item is changed by more than 15% in Oracle Product Hub Cloud.

What would you do to fulfill this requirement?

- A. Define an item rule of type `Assignment` on the Weight attribute to add it to a change order.
- B. Lock updates to the Weight attribute by using edit privileges.
- C. Set up a change policy on the Weight attribute based on the lifecycle phase.
- D. Define an item rule of type `Validation` and severity `Needs Approval` on the Weight attribute.

Correct Answer: D
