## QUESTION 1

Which two optional related to Planning and Budgeting Cloud (PBCS) security are true? (Choose two.)

- A. Users in the User role can create and edit Business Rules
- B. Users can write to members in a dimension that are calculated
- C. All users can install Smart View
- D. Users can have different access to Data Forms between the SUJ and Smart View

Correct Answer: AD

---

## QUESTION 2

To configure "Benefits and Taxes", which dimension should new members be imported into?

- A. Pay Type
- B. Component
- C. Account
- D. Property

Correct Answer: B

Imported Benefits, Taxes, and Additional Earnings using Components on the Workforce Configure page.

## QUESTION 3

Which two options are true when implementing security in Enterprise Planning and Budgeting Cloud (ePBCS)? (Choose two.)

- A. Users are restricted from applications by removing application/module security
- B. ePBCS roles can be assigned to members in all dimensions
- C. The member that is set to read that has a parent with write access to all descendants will result in an access level of read
- D. A user that is assigned read and write access to a member will result in write access

Correct Answer: BD

B: Assigning Access to Members To assign access to members:

D: The application checks access permissions at each level, first by user, then by group, based on the member's

access permissions inheritance relationship. If multiple access permissions exist, the least restrictive access permission is applied (for example, Write access takes precedence over Read access).

## QUESTION 4

Which three are traits of the Sandboxes feature?

- A. Sandboxes can be enabled at the application level only
- B. Sandboxes can be enabled for BSO and ASO cubes
- C. Planners can have multiple sandboxes
- D. Planners can immediately see the effect of their changes
- E. When working in a sandbox, planners can add members

Correct Answer: CDE

Planners can have multiple sandboxes and switch among them.

To make versions available to sandboxes, administrators create Version members and then select the member property Enable Sandboxes.

---

## QUESTION 5

Which LCM Category is required to restore dimensional security?

- A. Reporting
- B. Groups and Memberships
- C. Calculation Manager
- D. Planning

Correct Answer: B

In EPM System security mode, Essbase obtains user and group details (including user and group information and provisioning to Essbase applications) from Shared Services
