QUESTION 3

Your client uses product categories and global sourcing rules for supply planning. However, their newest product doesn\\'t follow these rules. For a specific item in the category, it needs to be sourced from a different supplier globally.

How should they set this up for the easiest maintenance, going forward?

A. Create a new global sourcing rule for the item; remove the category level assignments and create new item level assignments for all items in the category pointing each to the correct global sourcing rule.

B. Create a new local sourcing rule for the item; assign it to the assignment set at the item level; leave the category as is for the remainder of the products.

C. Create a new global sourcing rule for the item; assign it to the assignment set at the item-organization level; leave the category as is for the remainder of the products.

D. Create a new global sourcing rule for the item; assign it to the assignment set at the item level; leave the category as is for the remainder of the products.

E. Create a new global sourcing rule for the item; assign it to the assignment set at the item-organization level; alter the category to be category-organization for the remainder of the products.

Correct Answer: D

QUESTION 4

You want to be able to filter your data by the planner code attribute on the item. Where can you go to do this?
