-  **800,000+** Satisfied Customers

QUESTION 1

Which two cloud types are deployment models used in cloud computing? (Choose two.)

- A. collapsed cloud
- B. hybrid cloud
- C. public cloud
- D. layered cloud
- E. automatic cloud

Correct Answer: BC

QUESTION 2

Which option describes Cisco's virtual device context feature?

- A. logical virtualization of a single physical switch
- B. logical switches aggregated into a single physical switch
- C. logical switches aggregated into multiple physical switches
- D. multiple physical switches partitioned to a single virtual switch

Correct Answer: A

Cisco NX-OS introduces support for virtual device contexts (VDCs), which allows the switches to be virtualized at the device level. Each configured VDC presents itself as a unique device to connected users within the framework of that physical switch. The VDC runs as a separate logical entity within the switch, maintaining its own unique set of running software processes, having its own configuration, and being managed by a separate administrator. QUESTION 3

Which three items in Cisco Unified Computing System are subject to finite state machine validation? (Choose three.)

- A. SNMP get
- B. local login
- C. server discovery
- D. firmware downloads
- E. server boot

F. backup jobs

Correct Answer: CDF

QUESTION 4

A network architecture team is looking for a technology on Cisco Nexus switches that significantly simplifies extending Layer 2 applications across distributed data centers. The team wants the Cisco Data Center Interconnect between sites and without changing or reconfiguring the existing network design.

Which technology should be used?

- A. Multiprotocol Label Switching
- B. Cisco FabricPath
- C. virtual switching system
- D. virtual port channel
- E. Overlay Transport Virtualization

Correct Answer: E

QUESTION 5

Which technology maintains Fibre Channel virtual links between a pair of FCoE devices?

- A. ETS
- B. FLOGI
- C. PFC
- D. FIP

Correct Answer: D
