QUESTION 1

You are assigned to deploy a new host in a Vblock System, with block storage attached. Which type of zoning would be performed on the Cisco 9148 switch to accomplish this task?

A. port zoning

B. WWPN zoning

C. symbolic node name zoning

D. WWNN zoning

Correct Answer: B

QUESTION 2

You are required to setup the network interface on a Vblock System 320 storage array, which is used for file level access.

In which mode should the interface be configured?

A. fail safe networking

B. link aggregation

C. Ethernet channel

D. network trunking

Correct Answer: B

QUESTION 3

What is the requirement for adding VLANs to port channels for disjointed Layer 2 networks in a Cisco UCS?

A. VLANs must be explicitly assigned to an uplink.

B. VLANs should not be explicitly assigned to an uplink.

C. VLAN traffic must be allowed to travel over all uplinks.

D. VLANs must be assigned in the 301-400 range.

Correct Answer: A

QUESTION 4

A Vblock System 720 has been configured in the factory according to the VCE Logical Build Guide. Which statement is

correct?

A. Each service-profile should have at least one vNIC pinned to fabric interconnect A; one vNIC pinned to fabric interconnect B, and failover enabled.

B. Each service-profile should have at least one vNIC pinned to fabric interconnect A; one vNIC pinned to fabric interconnect B, and failover disabled.

C. Each service-profile should have at least one vHBA pinned to fabric interconnect A; one vHBA pinned to fabric interconnect B, and failover enabled.

D. Each service-profile should have at least one vHBA pinned to fabric interconnect A; one vHBA pinned to fabric interconnect B, and failover disabled.

Correct Answer: B

QUESTION 5

You have just deployed a new ESXi host in a Vblock System 320 and only have TCP/IP available for storage access.

Which protocol would be used for data store access?

A. NFS

B. CIFS

C. iSCSI

D. FCP

Correct Answer: A
