QUESTION 1

You are asked to create a new UCS template for an upcoming project. What information is required for the template? (Choose two)

A. Fully qualified domain names for each UCS blade

B. The World Wide Node Name (WWNN) pool to use

C. The vNIC adapter policy

D. The template UUID

Correct Answer: BC

QUESTION 2

You are asked to add a new ESXi host to an existing VMware cluster. You identify an available blade with the same specifications.

Which statement is a VCE recommendation?

A. Hosts in a VMware cluster should each belong to a different VSAN.

B. Service profiles in a VMware cluster should be kept on as few chassis as possible.

C. Service profiles in a VMware cluster should be spread out over as many Vblock® Systems as possible.

D. Hosts in a VMware cluster should always belong to the same service profile template.

Correct Answer: D

QUESTION 3

You have added physical disks to your Vblock® System 720 to a physical disk group and then created data devices.

What must you do to see the new capacity?

A. Add the devices to the masking group.

B. Map the devices to the front end ports.

C. Add the devices to the thin pool and enable them.

D. Add the devices to the FAST VP policy.

Correct Answer: C

QUESTION 4

What information is needed to configure the VSM-to-vCenter communication (SVS connection) for a Nexus 1000V? (Choose two)

A. The data center name in the vCenter server

B. The vCenter server IP address/FQDN

C. The control and packet VLAN Port Group name

D. The UUID of the physical server running VMware ESXi

Correct Answer: AB

QUESTION 5

You are managing a Vblock® System 340 and need to configure an additional ESXi server. After loading the server, you need to provision a few data devices to the host.

According to VCE best practices, which starting LUN ID should be used for these data devices?

A. 10

B. 32

C. 100

D. 132

Correct Answer: D
