**QUESTION 1**

Which product can replace a confidential document residing on a public share with a Marker File explaining why the document was removed?

A. Network Prevent

B. Network Protect

C. Network Monitor

D. Network Discover

Correct Answer: B

**QUESTION 2**

A system administrator can see basic incident data, but is unable to view any of the specific details of the incidents that are created.

How is the role configured?

A. The View option is selected, but Display Attributes are deselected.

B. The Edit option is deselected in the General tab.

C. Status and custom attributes are selected, but set to Edit.
D. Conditions are configured in the Incident Access tab.

Correct Answer: A

**QUESTION 3**

Refer to the exhibit.

| | sym1 | sym2 | sym3 | sym4 |
|---|---|---|---|---|
| Capacity | 300 | 300 | 300 | 400 |
| - Load | 0 | 0 | 0 | 0 |
| = Available Capacity | 300 | 300 | 300 | 400 |

```
group websg (
    SystemList = { sym1, sym2, sym3, sym4 }
    AutoStartList = { sym2, sym3 }
    AutoStartPolicy = Load
    Load = 100
)
```

On which node will the websg service group start if all nodes are powered on and come online at the same time?

A. sym1

B. sym2

C. sym3

D. sym4

Correct Answer: B

**QUESTION 4**

The service group named websg is currently online on the sym3 node. All other nodes are running.

Consider the following partial main.cf definition:

Group websg (

SystemList = { sym1=0, sym2=1, sym3=2 }

AutoStartList = {sym2, sym3 }

FailOverPolicy = Priority

)

The operator incorrectly shuts down a critical resource in the websg service group outside of Veritas

Cluster Server.

Based on the information provided, what will happen to the websg service group?

A. It will remain partially online on the sym3 node.

B. It will switch to the sym1 node.

C. It will switch to the sym2 node.

D. It will restart on sym3 node.

Correct Answer: B

**QUESTION 5**

GAB can be configured to automatically seed the cluster through I/O fencing, even when some cluster nodes are unavailable.

In which file does the autoseed_gab_timeout parameter need to be configured to enable this feature?

A. gabtab

B. main.cf

C. vxfenmode

D. vxfentab

Correct Answer: C
