QUESTION 1

A Managed Software Delivery policy executes in which order?

- A. detection check, wait for scheduled time, compliance check, download package, wait for scheduled time, remediation action
- B. wait for scheduled time, compliance check, remediation action, download, wait for scheduled time, Software Execution
- C. wait for scheduled time, compliance check, download package, wait for scheduled time, remediation action
- D. download package, wait for scheduled time, compliance check, detection check, remediation action, Software Execution

Correct Answer: C

QUESTION 2

A system administrator needs to quickly deploy Windows 7 to several new computers without preconfigured operating systems. The administrator decides to use an existing Ghost image since the necessary drivers have already been added to the DeployAnywhere database. The PXE Configuration is set to respond only to known computers. How should the administrator proceed?

- A. Use Ghost Solution Suite to distribute the image as the computers boot to the network.
- B. Import the list of new computers into the Management Console and assign an imaging task.
- C. Deploy an Automation Folder to the new computers to prepare them for imaging.
- D. Configure PXE to respond to a known list of MAC addresses and deploy the images only to the new systems.

Correct Answer: B

QUESTION 3

Which Patch Management Solution 7.1 policy controls the notification items displayed to the user when software updates are being processed on the endpoint?

- A. the Software Update Plug-in policy
- B. the Default Software Update Plug-in policy
- C. the Default Software Bulletin Plug-in policy
- D. the Default Patch Update Plug-in policy

Correct Answer: B

QUESTION 4

Deployment Solution backup images are designed to be used for which purpose?

- A. to be deployed to any computer that needs to be re-imaged
- B. to be deployed to any computer assigned to the same Deployment Solution Site Server from which the backup image was created
- C. to be deployed to the computer from which the computer was captured or its replacement
- D. to be deployed to a computer being migrated to a newer operating system

Correct Answer: C

QUESTION 5

A system administrator needs to change the domain to which a computer belongs. What must the administrator create before creating a task to change a computer's domain?

- A. a system configuration
- B. an automation configuration
- C. a Sysprep imaging configuration
- D. an Apply System Configuration task

Correct Answer: A
