- D. -assign

Correct Answer: C

---

## QUESTION 3

An administrator is reviewing an Infected Clients Report and notices that a client repeatedly shows the same malware detection. Although the client remediates the files, the infection continues to display in the logs. Which two functions should be enabled to automate enhanced remediation of a detected threat and its related side effects? (Select two.)

- A. Risk Tracer
- B. Terminate Processes Automatically
- C. Early Launch Anti-Malware Driver
- D. Stop Service Automatically
- E. Stop and Reload AutoProtect

Correct Answer: BD

---

## QUESTION 4

Which technology can prevent an unknown executable from being downloaded through a browser session?

- A. Insight
- B. Advanced Machine Learning
- C. Application Control
- D. Intrusion Prevention

Correct Answer: A

---

## QUESTION 5

An administrator plans to implement a multi-site Symantec Endpoint Protection (SEP) deployment. The administrator needs to determine whether replication is viable without having to make network firewall changes or change defaults in SEP.

Which port should the administrator verify is open on the path of communication between the two proposed sites? (Type the port number.)

- A. 8443

Correct Answer: A
