QUESTION 1

Which one of these statements best describes how the ProxySG locates an object in its cache?

- A. The ProxySG uses the hostname in the object's URL to determine in which cache directory the object is located
- B. The ProxySG uses the first 32 bytes of the object's URL to determine in which cache directory the object is located
- C. The ProxySG performs a hash against the URL of the object and uses the hash as the basis for a lookup into the table of cached objects

Correct Answer: C

QUESTION 2

What can you use to specify which traffic should be encrypted?

- A. The SSL Proxy
- B. Listeners
- C. All proxy services
- D. Categories

Correct Answer: A
