QUESTION 3

How should an administrator configure the components on the left in order to inventory computers that are

connected only through the Internet?

Drag and drop the components on the left into the correct zones on the right.

Select and Place:

Correct Answer:

QUESTION 4

A company has an environment where only some computers have the Symantec Workspace Virtualization (SWV) agent installed.

What happens to computers without the SWV Agent when an administrator distributes an MSI application through a Managed Delivery policy to all company computers and installs the application into a virtual layer?

A. The application installation fails

B. The application is installed as non-virtual, but the application is moved into a virtual layer after the SWV agent is installed

C. The SWV agent is automatically installed; then the application is installed into a virtual layer

D. The application is installed as non-virtual

Correct Answer: A

QUESTION 5

An administrator needs to quickly deploy Windows 7 to several new computers without pre-configured operating systems. The administrator decides to use an existing Ghost image since the necessary drivers have already been added to the DeployAnywhere database. The Network Boot Services configuration is set to respond only to known computers.

How should the administrator proceed?

A. Configure NBS to respond to a known list of MAC addresses and deploy the images only to the new systems.

B. Deploy an Automation Folder to the new computers to prepare them for imaging.

C. Import the list of new computers into the Management Console and assign an imaging task.

D. Use an Initial Deployment Event to distribute the image as the computers boot to the network.

Correct Answer: C
