QUESTION 1

An administrator did NOT install IT Analytics during the installation of IT Management Suite 8.1.

Which four steps should the administrator take to install and configure IT Analytics?

Place the steps on the left in the correct order on the right side of the screen under "Correct Order".

Select and Place:

Correct Answer:

Steps	Correct Order
Install cubes and reports	
Install IT Analytics and content packs via the Symantec Installation Manager (SIM)	
Install the IT Analytics Cube Update Service	
Configure SQL Integration service settings	
Configure cube processing tasks	
Configure the Analysis and Report server settings	

Steps	Correct Order
	Configure the Analysis and Report server settings
	Install IT Analytics and content packs via the Symantec Installation Manager (SIM)
	Install cubes and reports
	Install the IT Analytics Cube Update Service
	Configure SQL Integration service settings
	Configure cube processing tasks

QUESTION 2

An administrator needs to quickly deploy Windows 7 to several new computers without pre-configured operating systems. The administrator decides to use an existing Ghost image since the necessary drivers have already been added to the DeployAnywhere database. The Network Boot Services configuration is set to respond only to known

computers.

How should the administrator proceed?

A. Configure NBS to respond to a known list of MAC addresses and deploy the images only to the new systems.

B. Deploy an Automation Folder to the new computers to prepare them for imaging.

C. Import the list of new computers into the Management Console and assign an imaging task.

D. Use an Initial Deployment Event to distribute the image as the computers boot to the network.

Correct Answer: C

QUESTION 3
