QUESTION 1

Which two (2) features are unique to IT Analytics when compared to the reporting engine built into IT Management Suite 8.1? (Choose two.)

- A. Creation and display of graphical reports
- B. Actionable tasks within the report results
- C. Creation of key performance indicator-based dashboards
- D. Use of parameters to filter report results
- E. Calculation and display of trend analysis within the report results

Correct Answer: BE

QUESTION 2

Which object can an administrator add to an organizational group?

- A. User
- B. Report
- C. Policy
- D. Data class

Correct Answer: A

Organization is added as a member of the Organization Management role group. This account can then add other members to the role group as needed.

QUESTION 3

A virtualized application on a client computer is corrupted.

Which action can an administrator perform to fix the problem?

- A. Deactivate and Reset
- B. Deactivate and Reinstall
- C. Delete and Reset
- D. Reset and Reinstall

Correct Answer: A

QUESTION 4

Which item is available in the "Package Options" section of a software update policy?

- A. Shut down computer after remediation
- B. Allow immediate restart if required
- C. Delay until the next software update cycle
- D. Log off user after remediation

Correct Answer: B

Software Update policy "Package Options" here. Would you please advise if I should uncheck the "Allow immediate restart if required".
