QUESTION 1

A vRealize Automation administrator is tasked with creating a new tenant but is unable to login to the portal.

Which credential should the vRealize Automation administrator use to complete this task?

- A. admin@vsphere.domain
- B. tenant-admin@vsphere.domain
- C. administrator@vsphere.local
- D. configurationadmin@vsphere.local

Correct Answer: C

QUESTION 2

A vRealize Automation administrator wants to be able to reconfigure the CPU resources of a managed virtual machine that is deployed by a user in a business group. The administrator is not a member of this business group.

What is the minimum role required for the administrator to be able to reconfigure the virtual machine without changing its ownership or business group?

- A. Manager role
- B. Support role
- C. Shared access role
- D. User role

Correct Answer: A

QUESTION 3

A tenant administrator would like to initiate a reclamation request for underutilized virtual machines in their vRealize Automation environment. The tenant administrator selects the candidate deployment and sends a reclamation request to the owners of the virtual machines.

What happens if the virtual machine owners do not respond to the reclamation request in a timely manner?

- A. The virtual machine is immediately expired and powered off.
- B. The virtual machine gets a new lease as determined by the administrator.
- C. The virtual machine continues to run and expires per the lease terms defined in the blueprint.

D. The virtual machine is immediately expired and deleted.

Correct Answer: B

QUESTION 4

Which on-demand network component is only available when using NSX Data Center for vSphere on the blueprint design canvas?

- A. On-demand private network
- B. On-demand NAT network
- C. On-demand routed network
- D. On-demand load balancer

Correct Answer: B

Reference: <https://docs.vmware.com/en/vRealize-Automation/7.6/com.vmware.vra.prepare.use.doc/GUID716114B0-C72A-48D6-9274-87F81C1AD8F3.html>

QUESTION 5

A blueprint architect wants to grant a user the ability to edit a custom property in a blueprint request during deployment.

Which two options must be enabled to meet this requirement? (Choose two.)

- A. multi-select
- B. show in request
- C. encrypted
- D. overridable

Correct Answer: CD
