QUESTION 3

Which two types of entities can be a part of a vRealize Orchestrator package? (Choose two.)

A. Policy templates

B. Inventory

C. Configurations

D. Logs

E. Scripting elements

Correct Answer: AB

Reference: https://docs.vmware.com/en/vRealize-Automation/7.5/vrealize-orchestrator-75-using-pluginsguide.pdf

QUESTION 4

An architect is designing a machine blueprint containing web, application and database servers utilizing NSX-T for networking. Upon provisioning, network traffic must be automatically restricted to allow the web server to communicate only with the application server, the application server to communicate with both the web and database servers, and the database server to be blocked from communicating with the other servers.

Which methods can be used to accomplish this?

A. Add an appropriate security group to the blueprint from within the Blueprint Properties, under NSX Settings.

B. Specify an appropriate NSX-T Existing Network and Security (NS) Group in the blueprint and assign it to each machine.

C. Create or update an appropriate security group within NSX-T to include the provisioned machines.

D. Assign an appropriate security group to the entitled items or entitled service with the entitlement.

Correct Answer: C

QUESTION 5

Which directory type should be created in a tenant if an administrator wants to use multi-domain or multi-forest deployments?

A. Active Directory over LDAP

B. Local User Directory

C. Active Directory over Integrated Windows Authentication (IWA)

D. LDAP Directory

Correct Answer: C
