QUESTION 2

An administrator wants to simplify the cloud configuration as much as possible. Recently the administrator was asked to simplify the blueprint creation and requesting process. The goal is to create a single blueprint that can be deployed to different cloud accounts available in the environment.

Depending on the cloud, the appropriate template should be used.

Which vRealize Automation construct can the administrator use to achieve this goal?

- A. Image Mappings
- B. Customization Specifications
- C. Flavor Mappings
- D. Storage Profiles

Correct Answer: B

QUESTION 3

An administrator is tasked with creating a new vSphere and NSX blueprint for the App-Dev team. The administrator successfully configures multiple network profiles that will create different types of on-demand networks. The App-Dev team wants the blueprint to create an on-demand network that can be connected externally. Which two network types should the administrator consider using in the blueprint? (Choose two.)

- A. Routed
- B. Public
- C. Private

D. Outbound

E. Existing

Correct Answer: CD
