An administrator configures a lease policy, (“1 Day Lease”), for the App-Dev project so that machines have a starting lease of one day and a maximum lease of five days.

The following week, the administrator is assigned a ticket to address an issue with machines being deleted without any notifications being received. The administrator requests a new machine deployment through the App-Dev project's service catalog. Given the one day lease period, the administrator expects to receive an automated "Lease Expiring" system immediately following a successful deployment; however, the email is not received. The administrator checks the deployment that has just been created (as displayed in the exhibit) and confirms that the "1 Day Lease" policy has been correctly applied.

- B. Configure the notification email Server.
- C. Ensure the users have notifications enabled.
