## QUESTION 1

An administrator creates a content source to import three Cloud Assembly cloud templates into Service Broker. After some time, he is tasked with deleting the content source.

What would happen if and when this content source is deleted?

- A. All three cloud templates are deleted from Service Broker and Cloud Assembly.
- B. All three cloud templates are deleted from Service Broker.
- C. Only the content source is deleted but the cloud templates remain intact in Service Broker.
- D. Once created, a content source cannot be deleted.

Correct Answer: C

## QUESTION 2

Which step must an administrator take when performing a vRealize Automation manual installation using Lifecycle Manager? (Choose the best answer.)

- A. Set up a certificate in the certificate locker
- B. Configure storage policies
- C. Configure an additional network interface
- D. Integrate Active Directory

Correct Answer: A

## QUESTION 3

An administrator is tasked with creating a new vSphere and NSX cloud template for the App-Dev team. The administrator successfully configures multiple network profiles that will create different types of on demand networks. The App-Dev team wants the cloud template to create an on-demand network that can be connected externally.

Which two network types should the administrator consider using in the cloud template? (Choose two.)

- A. Existing
- B. Public
- C. Outbound

D. Private

E. Routed

Correct Answer: CE

---

## QUESTION 4

Although an organization has sufficient capacity within the on-premises VMware SDDC, the CTO has decided to evolve the public cloud strategy into a “Right Cloud First” strategy. To support this, the administrator has suggested the use of vRealize Automation to provide a consistent portal with a multi-cloud service catalog to enable the users to use self-service to deploy workloads into different clouds. The administrator needs to configure cloud accounts for public clouds to support the new strategy.

Which two of the public clouds are supported platforms? (Choose two.)

A. Microsoft Azure

B. IBM Cloud

C. Google Cloud Platform

D. Oracle Cloud

E. OVH Cloud

Correct Answer: AC

---

## QUESTION 5

The administrator is tasked with creating a number of different content sources in Service Broker so that multiple types of catalog items can be created.

What is the only public cloud template that can be selected as a content source in Service Broker? (Choose the best answer.)

A. Google Cloud Deployment Manager templates

B. Alibaba Cloud Resource Orchestration Service templates

C. AWS CloudFormation templates

D. Azure Resource Manager (ARM) templates

Correct Answer: C
