## QUESTION 1

An existing Workspace ONE environment contains 20,000 users/devices. An additional 25,000 users/devices are planning to be added to the system. The total number of users will be 45,000. Which is VMware's best practice recommendation for determining the additional hardware that may be required?

- A. Add an additional server at each node to ensure overhead for the new device addition.
- B. No scaling will be needed for the additional device count and load on the environment.
- C. Review the latest recommended architecture documentation for server scalability recommendations.
- D. Review recommended architecture documentation from any version for server scalability recommendations.

Correct Answer: C

---

## QUESTION 2
