QUESTION 1

Which do Protocol Endpoints refer to?

A. a VASA provider

B. a pool of raw storage capacity that spans different physical arrays

C. a Virtual Volumes datastore

D. a logical I/O proxy of the physical storage fabric

Correct Answer: D

QUESTION 2

A vSphere Administrator must ensure that vCenter Server service is running in a domain user account

rather than Local System Account.

To accomplish this, the user account should have which two permissions? (Choose two.)

A. Log on as a service.

B. Act as part of the operating system.

C. Log on as a batch job.

D. Log on locally.

Correct Answer: AB

On each system that is running vCenter Server, verify that the domain user account has these permissions: Member of the Administrators group Act as part of the operating system Log on as a service https://kb.vmware.com/s/article/2052334

QUESTION 3

What is the VMware recommendation for the minimum number of network adapters for beacon probing?

A. 1

B. 3

C. 2

D. 4

Correct Answer: B

Reference: https://kb.vmware.com/s/article/1005577

QUESTION 4

A vSphere administrator manages a cluster which includes critical and non-critical virtual machines. The cluster requires different permissions for contractors and non-contractors. How can the administrator exclude the contractor group from some of the critical VMs?

A. Remove permission for contractors on the cluster level. Apply permission on the critical VMs for noncontractors.

B. Apply permission for both contractors and non-contractors on the cluster level. Remove permission on the critical VMs for contractors.

C. Apply permission for both contractors and non-contractors on the VMs. Remove permission on the critical VMs for contractors.

D. Apply permission for both contractors and non-contractors on the cluster level.

Correct Answer: B

To exclude the contractor group simply apply permission for both contractors and non-contrators on the cluster level. After that, remove permissions on the critical VMs for contractors.

QUESTION 5

Which are two requirements for configuring vCenter HA? (Choose two)

A. A secondary NIC on the active node must be create and configured

B. A management and heartbeat network must be created and configured

C. A default gateway entry must be added for the cluster network

D. All components must be on the same subnet as the management network

E. The network IP addresses for the active, passive, and witness nodes must be static

Correct Answer: BE
