QUESTION 1

Which two statements are true regarding storing user details in Spring Security? (Choose two.)

A. With a custom UserDetailsService defined in the ApplicationContext, Spring Boot still creates the default user.

B. Passwords must be hashed and the default hashing algorithm is MD5.

C. User details can be stored in custom storage and retrieve them by implementing the UserDetailsService interface.

D. User details can be stored in a database, in LDAP, or in-memory.

E. The user details includes username and password but not authorities.

Correct Answer: AE

QUESTION 2

Which two statements are correct regarding Spring Boot auto-configuration? (Choose two.)

A. Auto-configuration uses @Conditional annotations to constrain when it should apply.

B. Auto-configuration could apply when a bean is missing but not when a bean is present.

C. Auto-configuration is applied by processing candidates listed in META-INF/spring.factories.

D. Auto-configuration could apply when a bean is present but not when a bean is missing.

E. Auto-configuration is applied before user-defined beans have been registered.

Correct Answer: DE

QUESTION 3

Which two statements about pointcut expressions are true? (Choose two.)

A. A pointcut expression cannot specify the type of parameters.

B. A pointcut expression will throw an exception if no methods are matched.

C. A pointcut expression cannot have a wildcard for a method name.

D. A pointcut expression can include operators such as the following: andand (and), || (or), ! (not).

E. A pointcut expression can be used to select join points which have been annotated with a specific annotation.

Correct Answer: DE

QUESTION 4

Which two statements are true concerning constructor injection? (Choose two.)

A. If there is only one constructor the @Autowired annotation is not required.

B. Constructor injection only allows one value to be injected.

C. Constructor injection is preferred over field injection to support unit testing.

D. Construction injection can be used with multiple constructors without @Autowired annotation.

E. Field injection is preferred over constructor injection from a unit testing standpoint.

Correct Answer: CE

QUESTION 5

Refer to the exhibit.

```
@Configuration
@ConditionalOnClass (HelloService.class)
public class HelloAutoConfig {
        @ConditionalOnMissingBean (HelloService.class)
        @Bean
        HelloService helloService() {
                return new TypicalHelloService ();
        }
}
```

Which two statements are correct regarding the HelloAutoConfig auto-configuration class when it is specified in the META-INF/spring.factories file? (Choose two.)

A. A HelloService bean will be created from the helloService() method even if the HelloService.class is not in the classpath.

B. A HelloService bean will be created from the helloService() method only when there is no other HelloService bean in the ApplicationContext.

C. This auto-configuration class is used only when the HelloService.class is not on the classpath.

D. This auto-configuration class is used only when the HelloService.class is on the classpath.

E. A HelloService bean will be created from the helloService() method and will replace existing a HelloService bean in the ApplicationContext.

Correct Answer: BD
