QUESTION 4

A customer is concerned with the use of the issued laptops even when devices are not on the corporate network. Which agent continues to be operational even when the host is not on the Cisco ISE network?

- A. Cisco ISE Agent
- B. Cisco NAC Agent
- C. Cisco Custom Agent
- D. Cisco NAC Web Agent

Correct Answer: B

QUESTION 5

What protects MacSec Frame?

- A. ICV
- B. MKA

Correct Answer: A

"A switch using MACsec accepts either MACsec or non-MACsec frames, depending on the policy associated with the client. MACsec frames are encrypted and protected with an integrity check value (ICV). When the switch receives frames from the client, it decrypts them and calculates the correct ICV by using session keys provided by MKA. The switch compares that ICV to the ICV within the frame. If they are not identical, the frame is dropped. The switch also encrypts and adds an ICV to any frames sent over the secured port (the access point used to provide the secure MAC service to a client) using the current session key."
