QUESTION 1

Scenario

Your organization has subscribed to the Cisco Cloud Web Security (CWS) service. You have been assigned the task of configuring the CWS connector on the ISR-G2 router at a branch office. Details of the configuration requirements include:

- Content scanning should be enabled for traffic outbound from FastEthernet0/1
- Explicitly specify 8080 for both the http and the https ports
- The primary CWS proxy server is proxy-a.scansafe.net
- The secondary CWS proxy server is proxy-b.scansafe.net
- The unencrypted license key is 0123456789abcdef
- If the CWS proxy servers are not available, web traffic from the branch office should be denied
- After configuration, use show commands to verify connectivity with the CWS service and scan activity

You can access the console of the ISR at the branch office using the icon on the topology display. The enable password is **Cisco!23**.

Topology

Branch-ISR

Press RETURN to get started!

A.

Correct Answer: A

Answer: Review the part for full solution. We need to define the parameter map, specifying port 8080 for http and https and define the servers and the license:

Branch-ISR#config t

Branch-ISR(config)# parameter-map type content-scan global Branch-ISR(config-profile)#server scansafe primary name proxy-a.scansafe.net port http 8080 https 8080

Branch-ISR(config-profile)#server scansafe secondary name proxy-b.scansafe.net port http 8080 https 8080

Branch-ISR(config-profile)#license 0 0123456789abcdef

If the CWS proxy servers are not available, we traffic should be denied. This is done by the following configuration:

Branch-ISR(config-profile)#server scansafe on-failure block-all

Now we need to apply this to the fastethernet 0/1 interface outbound:

Branch-ISR(config)#interface Fastethernet 0/1

Branch-ISR(config-if)#content-scan outbound

Branch-ISR(config-if)#exit

Branch-ISR(config)#exit

Finally, we can verify out configuration by using the "show content-scan summary command:

Branch-ISR#show content-scan summary

Primary: 72.37.244.203(Up)*

Secondary: 70.39.231.99 (Up)

Interfaces: Fastethernet0/1

QUESTION 2

Elliptic curve cryptography is a stronger more efficient cryptography method meant to replace which current encryption technology?

A. RSA

B. DES

C. AES

D. 3DES

Correct Answer: A

QUESTION 3

Which version of AsyncOS for web is required to deploy the Web Security Appliance as a CWS connector?

A. AsyncOS version 7.7.x

B. AsyncOS version 7.5.x

C. AsyncOS version 7.5.7

D. AsyncOS version 7.5.0

Correct Answer: C

QUESTION 4

Which two tasks can the network discovery feature perform? (Choose two)

A. host discovery

B. Block traffic

C. user discovery

D. reset connection

E. route traffic

Correct Answer: AC

QUESTION 5

With Cisco FirePOWER Threat Defense software, which interface mode do you configure to passively receive traffic that passes the appliance?

A. transparent

B. routed

C. passive

D. inline set

E. inline tap

Correct Answer: C
